Journal of Epidemiology and Global Health , Global Health Solomon Benatar, Gillian Brock, 2021-02-18 Addressing global health is one of the largest challenges facing humanity in the 21st century however this task is becoming even more formidable with the accelerated destruction of the planet Building on the success of the previous edition the book outlines how progress towards improving global health relies on understanding its core social economic political environmental and ideological aspects A multi disciplinary group of authors suggest not only theoretically compelling arguments for what we must do but also provide practical recommendations as to how we can promote global health despite contemporary constraints The importance of cross cultural dialogue and utilisation of ethical tools in tackling global health problems is emphasised Thoroughly updated new or expanded topics include mass displacement of people novel threats including new infectious diseases global justice and ecological ethics and planetary sustainability Offering a diverse range of perspectives this volume is essential for bioethicists public health practitioners and philosophers *Global Health Justice and Governance* Dr. Prah Ruger, 2018-05-03 In a world beset by serious and unconscionable health disparities by dangerous contagions that can circle our globalized planet in hours and by a bewildering confusion of health actors and systems humankind needs a new vision a new architecture new coordination among renewed systems to ensure central health capabilities for all Global Health Justice and Governance lays out the critical problems facing the world today and offers a new theory of justice and governance as a way to resolve these seemingly intractable issues A fundamental responsibility of society is to ensure human flourishing The central role that health plays in flourishing places a unique claim on our public institutions and resources to ensure central health capabilities to reduce premature death and avoid preventable morbidities Faced with staggering inequalities imperiling epidemics and inadequate systems the world desperately needs a new global health architecture Global Health Justice and Governance lays out this vision **Global Health** Kevin McCracken, David R. Phillips, 2017-07-14 Global Health continues to provide readers with a comprehensive up to date and thought provoking outline and understanding of the constantly evolving global health landscape In this new edition the authors have maintained the successful structure and organisation of the previous edition to examine and explain recent health changes and consider likely future patterns New or expanded topics covered include emerging and re emerging infectious disease threats increasing awareness of and interest in antimicrobial resistance and superbugs terrorism global conflict and health the new UN 2030 Agenda for Sustainable Development the drive for Universal Health Coverage UHC the use of information technology in global health substance abuse palliative and end of life care ethical issues in global health Using clear and original explanations of complex issues this text makes extensive use of boxed case studies and international examples with discussion questions posed for readers at the end of each chapter Readers will also be able to take advantage of the new website that was designed to complement this book Global Health is essential reading for students and researchers of global

Cardiovascular Disease David C. Gaze,2023-08-23 This book provides a comprehensive overview of cardiovascular diseases CVDs and associated conditions It is organized into three sections on Cardiovascular Pathophysiology Cardiovascular Diagnostics and Cardiovascular Treatments Chapters address such topics as the role of obesity in CVD cardiotoxicity cardio oncology CVD in different disease states modalities for detecting CVD interventional strategies to prevent or treat CVD and much more *Human and Planetary Health* Kees van Laarhoven,2023-10-06 his professional journey travelling through an

upcoming field of surgery with apparently unlimited possibilities Kees van Laarhoven witnessed major milestones and breakthroughs Already as a medical student he was amazed by surgical courage During residency he experienced hard work diligence and perseverance of surgical professionals Today as a surgeon with over 25 years of clinical experience he now looks at pieces of art in surgery with professionals compassionately bringing hope to patients But he also sees inconvenient truths in our healthcare system with patients evolving from one predictable and preventable disease to the next and with professionals following disease trends rather than applying their knowledge to redirect disease into health The modern disease oriented care system becomes undesirable and unsustainable And there are more inconvenient truths that have progressed rather than diminished in time Healthcare is not easily accessible to the major half of the global population and for those who have access with a growing global population healthcare may become unaffordable in the future Moreover from an environmental perspective both human and planetary health are compromised and ask for a One Health approach Being fascinated by the questions of how and why did this all happen Kees van Laarhoven took up a scientific survey to comprehend and learn how things still can be changed He found that clear solutions are there Please join him on his journey
