and philosopher I met him for the first time when he was the Chairman of the Research Advisory Council of the National Chemical Laboratory NCL in the nineteen eighties I was then in my late thirties Professor Rao has an uncanny ability to spot talent among the young He was the President of the Indian Science Congress in the year 1988 which was held in Pune University Mr Rajiv Gandhi was the Prime Minister and he inaugurated the Science Congress Later on during the lunch that followed Prof Rao made a special point to introduce me to Rajiv Gandhi I still remember his words He said Mr Prime Minister meet a rising young star of Indian science Little did I then know that within the next couple of months he would make me a member of the Science Advisory Council to the Prime Minister which he was chairing At 42 I was the youngest member and I remember people calling me the baby of the team Getting that huge exposure at such a young age was something very special for me I got a helicopter view of India at large It helped me enormously as I moved on in life Padma Vibhushan Dr Raghunath Anant Mashelkar      Energy Research Abstracts ,1990      **Special issue on the impact of theoretical methods on solid state chemistry** Richard Dronskowski,2003      Multifunctional Nanostructured Metal Oxides for Energy Harvesting and Storage Devices Vijay B. **Science** R.W. Cahn,2001-03-16 The Coming of Materials Science both covers the discipline of materials science and draws an impressionistic map of the present state of the subject The first chapter examines the emergence of the materials science concept in both academe and industry The second and third chapters delve back into the prehistory of materials science examining the growth of such concepts as atoms crystals and thermodynamics and also examine the evolution of a number of neighbouring disciplines to see what helpful parallels might emerge The book contains numerous literature references Many refer to the earliest key papers and books while others are to sources often books offering a view of the present state of a topic Early references are to the past but as the book continues it brings the reader up to date with more recent sources The author Professor Robert Cahn FRS has striven to be critical about the history of the discipline of materials science and to draw general conclusions about scientific practice from what he has discovered about the evolution of materials science Further issues that the book highlights include What is a scientific discipline How do disciplines merge and differentiate Can a discipline also be interdisciplinary Is materials science a real discipline A large range of themes is presented in the book and readers are invited to interact with the author if they reach alternative conclusions This book is not just for reading and reference but exists to stimulate thought and provoke discussion as well Materials Characterisation D.O. Northwood,T. Rang,J. De Hossen,C. A. Brebbia,2018-03-27 Containing selected papers on Materials Characterisation this volume presents the latest research in the field Material and contact characterisation is a rapidly advancing field that requires the application of a combination of numerical and experimental methods Contributions come from both industry and research communities using computational methods and performing experiments Demand for high quality production from both industry and consumers has led to rapid developments in materials science and engineering Current research is focussed on modification technologies that can increase the surface durability of materials The characteristics of the system reveal which surface engineering methods should be chosen and as a consequence it is essential to study the combination of surface treatment and contact mechanics The accurate characterisation of the physical and chemical properties of materials requires the

application of both experimental techniques and computer simulation methods in order to gain a correct analysis A very wide range of materials starting with metals through polymers and semiconductors to composites necessitates a whole spectrum of characteristic experimental techniques and research methods The papers in this book examine various combinations of techniques across various topics      **Ferroelectrics** Mickaël Lallart, 2011-08-23 Ferroelectric materials have been and still are widely used in many applications that have moved from sonar towards breakthrough technologies such as memories or optical devices This book is a part of a four volume collection covering material aspects physical effects characterization and modeling and applications and focuses on the underlying mechanisms of ferroelectric materials including general ferroelectric effect piezoelectricity optical properties and multiferroic and magnetoelectric devices The aim of this book is to provide an up to date review of recent scientific findings and recent advances in the field of ferroelectric systems allowing a deep understanding of the physical aspect of ferroelectricity      Treatise on Magnetocaloric MnFe(Si, P) Compounds ,2016
