

Probability and Inheritance (continued)**34**

- b. Calculate the percent of the total that each combination (heads-heads, heads-tails, or tails-tails) occurred and record it in the proper column. To find the percent, divide each observed number by 40 and multiply by 100.

According to the law of probability, when there are four equally likely outcomes from a procedure, the probability that one of the outcomes will occur is $1/4$ or 25%. We can see how this is calculated. For example, we know that in tossing two pennies, the probability of heads occurring on one penny is $1/2$. The probability of heads occurring on the other penny is also $1/2$. The probability of heads occurring on both pennies in one toss is $1/2 \times 1/2 = 1/4$.

2. Using the law of probability, predict the expected outcomes of tossing two pennies.
- Record the expected numbers in the proper column in Table 2.
 - Calculate the percent of the total that each combination is expected to occur, as you did above (problem 1-b). Enter these numbers in the proper column.
 - Calculate the deviation by subtracting the expected from the observed and enter your results in Table 2.

Table 2. Probability of Independent Events Occurring Simultaneously

Combinations	Observed	%	Expected	%	Deviation
Heads Heads					
Heads Tails Tails Heads					
Tails Tails					
Total	40	100%	40	100%	

PART III. PROBABILITY AND MENDELIAN GENETICS

We can use the law of probability to predict the probability of given genetic traits appearing in the offspring of particular parents. Punnett squares can also be used to make these predictions.

When gametes are formed, the pair of genes that determine a particular trait separate, and one gene goes to each gamete. When fertilization occurs, a male and a female gamete fuse. The resulting zygote, which develops into the new individual, now contains two genes for the trait. Which two of the parents' genes appear in the zygote is a result of chance.

In this case we will consider the inheritance in pea plants of round and wrinkled peas. *R* will represent the dominant gene for round peas and *r* will represent the recessive gene for wrinkled peas.
