Bovbjerg, 2010-06 Voting is fundamental to the U S democratic system and federal law provides broad protections for people with disabilities including older voters Many long term care facility residents who often have physical or cognitive impairments vote by absentee or early ballot Concerns have been raised about the extent to which states and localities are helping the increasing number of facility residents exercise their right to vote especially those requiring voting assistance who may be subject to undue influence or unauthorized completion of their ballot by facility staff or relatives Given these concerns this report identified the actions taken to facilitate and protect voting for long term care facility residents at 1 the state level and 2 the local level Charts and tables **Financing the 2016 Election** David B. Magleby, 2019-04-30 Money and politics in an election that broke the mold Beginning with the 1960 election readers could turn to one book for an authoritative and comprehensive examination of campaign finance at the federal level Now the latest in this respected series Financing the 2016 Election explores the role of money in one of the most unconventional elections in modern American

history A team of leading scholars has dug into the roles played by political parties and special interest groups including their Super PACS in the presidential and congressional elections of 2016 David Magleby and his team of experts examined Federal Elections Commission reports and interviewed dozens of key participants including representatives of virtually all the major interest groups active in the 2016 election cycle They place that election in the context of how U S elections have been financed during recent decades a context that illustrates how dramatically different campaign finance is today from the past Among the most important changes has been the growth of so called Super PACS which have become increasingly important both in the financing they provide candidates and in their ability to act independently both for and against candidates Overall Super PACS doubled their spending in 2016 from four years earlier Taking a comprehensive approach this book helps readers understand how the financing of elections including the increasing reliance by candidates on outside special interest groups ultimately affects politics and public policy

The Politics of Disenfranchisement Richard K. Scher,2015-03-04 We think of our American democracy as being a model for the world and it has been But today it compares unfavorably in some respects especially when it comes to the universal franchise The right to vote is more conditional and less exercised in the United States than in many other mature democracies As became clear to all in the presidential election of 2000 when the stakes are high efforts to define voter eligibility and manage the voting and vote counting process to the advantage of one s own side are part of hard ball politics It is that experience that gave rise to this book Written by an author with wide expertise on Southern and Florida politics and districting the book begins with a deceptively simple question why is it so hard to vote in America It proceeds in seven chapters to examine the ways that some people are formally or effectively disenfranchised and to review how control of the ballot and the voting process is constrained manipulated and contested

geography of America's presidential elections from Washington to Obama. An invaluable addition to the library of all those interested in presidential elections and U.S. politics. Marion Orr, Frederick Lippitt Professor of Public Policy and Professor of Political Science, Brown University. This volume sets an extraordinarily high standard in scholarship, completeness, description, and explanation of our political process. It has been said that all politics are local, but never before has this been demonstrated with such clarity and panache using the simple method of standardized tables summarizing voting, then showing state and county breakdowns of the numbers, greatly strengthened by beautiful full-color maps and cartograms. Every scholar of politics and democracy will benefit from the work laid out in this volume. Keith Clarke, Professor of Geography, University of California, Santa Barbara. Presidential Elections is an almanac of the popular vote in every presidential election in American history, analyzed at the county level with histories of each campaign, graphs, and stunning four-color maps. Most Americans are familiar with the crude red-state/blue-state maps used by commentators and campaign strategists, and even for want of an alternative by many academics. In providing a higher-resolution view of voting behavior, the authors of this new volume enable examination of local and regional political trends that are invisible in state-level aggregations. Presidential Elections will enable scholars to more subtly analyze voting behavior, campaigns, and presidential politics; commentators will use it to analyze trends and trace the historical evolution of new coalitions and voting blocs; strategists will use it to plan campaigns and mobilize constituencies. Presidential Elections will become the standard almanac on the subject, a required resource for academic and public libraries as well as for scholars, consultants, and pundits nationwide. Donald R. Deskins Jr. is a political geographer and Emeritus Professor of Sociology and a former Associate Dean of the Horace H. Rackham School of Graduate Studies at the University of Michigan. Hanes Walton Jr. is Professor of Political Science at the University of Michigan. He also holds positions as Senior Research Scientist at the Center for Political Studies and as a faculty member in the Center for Afroamerican and African Studies. Sherman C. Puckett is a Ph.D. graduate of the University of Michigan in urban and regional planning. He was a mayoral appointee in the data processing department of the Coleman A. Young administration in the City of Detroit and recently retired from Wayne County government as manager of technology, geographic information systems, and development of maintenance management systems.

Jeff Edmondson, Nancy L. Zimpher, 2014-11-01. Chronicles the development of a framework for collective impact in education through the perspectives of its founders and lessons learned from pioneering sites. In 2006 Cincinnati and Northern Kentucky had been suffering from many of the same challenges facing metro regions across the country. Despite significant investments in education from the public and private sectors, outcomes were alarming. Kindergarten readiness was below fifty percent, and nearly half of the students in the Cincinnati Public Schools were dropping out before high school graduation. Fortunately, a diverse group of community leaders across sectors was exploring a transformative approach to improving education as a system. This gathering of leaders was the genesis of the Strive Partnership, which served as the inspiration for

the theory of collective impact Together these partners are building a cradle to career civic infrastructure based on the idea that everyone in a community has a stake in the success of every child This book chronicles the early stages of this ongoing journey from the perspective of the founding chair and director of this work drawing upon lessons from Cincinnati Northern Kentucky and four other pioneering local partnerships The experiences captured in these five regions helped lay the foundation for the StriveTogether Cradle to Career Network a national community of practice on the cutting edge of social change I have always held that education is the responsibility of the entire community not just the schools StriveTogether's experience shows that it is possible to drive the systemic change we need I recommend this book to all who are looking for a community wide roadmap to a better future for our children Richard W Riley former US Secretary of Education No one sector can tackle society's challenges alone Striving Together's practical guide offers excellent tools for leaders in all sectors to use in creating collaborative solutions to improve education and outcomes for children It's inspiring to see communities coming together to create opportunities for all children with a cradle to career approach Stacey D Stewart US President United Way Worldwide History provides many examples of efforts to help whole communities to thrive Collective impact is the latest and most promising idea for how to get it done and StriveTogether is the leading example on the ground This book is a welcome contribution representing the state of the art Ronald F Ferguson Faculty Co Chair and Director the Achievement Gap Initiative at Harvard University Faculty Co Director Pathways to Prosperity at the Harvard Graduate School of Education **Archival Outlook** ,2007 *Campaigns & Elections* ,2008 Focus On: 100 Most Popular United States National Medal of Arts Recipients Wikipedia contributors, **How Barack Obama Won** Chuck Todd,Sheldon Gawiser,2012-08-28 This detailed overview and analysis of the results of Barack Obama's historic 2008 presidential win gives us the inside state by state guide to how Obama achieved his victory and allows us to see where the country stood four years ago Although much has changed in the nearly four years since How Barack Obama Won remains the essential guide to Obama's electoral strengths and offers important perspective on his 2012 bid The votes in each state for Obama and McCain are broken down by percentage according to gender age race party religious affiliation education household income size of city and according to views about the most important issues the economy terrorism Iraq energy healthcare the future of the economy worried not worried and the war in Iraq approve disapprove *Authoritarian Populism and the Rural World* Ian Scoones,Marc Edelman,Saturnino M. Borrás Jr.,Lyda Fernanda Forero,Ruth Hall,Wendy Wolford,Ben White,2021-06-29 The rise of authoritarian nationalist forms of populism and the implications for rural actors and settings is one of the most crucial foci for critical agrarian studies today with many consequences for political action Authoritarian Populism and the Rural World reflects on the rural origins and consequences of the emergence of authoritarian and populist leaders across the world as well as on the rise of multi class mobilisation and resistance alongside wider counter movements and alternative practices which together confront authoritarianism and nationalist populism The book includes 20 chapters written by contributors to

the Emancipatory Rural Politics Initiative ERPI a global network of academics and activists committed to both reflective analysis and political engagement Debates about populism nationalism authoritarianism and more have exploded recently but relatively little of this has focused on the rural dimensions Yet wherever one looks the rural aspects are key not just in electoral calculus but in understanding underlying drivers of authoritarianism and populism and potential counter movements to these Whether because of land grabs voracious extractivism infrastructural neglect or lack of services rural peoples disillusionment with the status quo has had deeply troubling consequences and occasionally hopeful ones as the chapters in this book show The chapters in this book were originally published in The Journal of Peasant Studies

of the Soapy Smith story Spude traces the efforts of Skagway s boosters to reinforce a morality tale at the expense of a complex story of town building and government formation The idea that Smith s death had made a lawless town safe served Skagway s economic interests Spude s engaging deconstruction of Soapy s story models deep research and skepticism crucial to understanding the history of the American frontier
