PETER R. BREGGIN, MD

Guilt, Shame, and Anxiety Peter Roger Breggin, 2014 With the first unified theory of guilt shame and anxiety this pioneering psychiatrist and critic of psychiatric diagnoses and drugs examines the causes and effects of psychological and emotional suffering from the perspective of biological evolution child development and mature adult decision making Drawing on evolution neuroscience and decades of clinical experience Dr Breggin analyzes what he calls our negative legacy emotions the painful emotional heritage that encumbers all human beings The author marshals evidence that we evolved as the most violent and yet most empathic creatures on Earth Evolution dealt with this species threatening conflict between our violence and our close knit social life by building guilt shame and anxiety into our genes These inhibiting emotions were needed prehistorically to control our self assertiveness and aggression within intimate family and clan relationships Dr Breggin shows how guilt shame and anxiety eventually became self defeating and demoralizing legacies from our primitive past which no longer play any useful or positive role in mature adult life He then guides the reader through the Three Steps to Emotional Freedom starting with how to identify negative legacy emotions and then how to reject their control over us Finally he describes how to triumph over and transcend guilt shame and anxiety on the way to greater emotional freedom and a more rational loving and productive life **Promoting Psychological Wellbeing in Children and Families Bruce** Kirkcaldy, 2015-06-30 Psychology s contribution to health research and clinical practice continues to grow at a phenomenal pace In this book a global and multidisciplinary selection of outstanding academics and clinicians focus on the psychological well being and positive health of both children and families in order to depathologise mental disorders Handbook to Dissolve Shame and Defense Susan Warren Warshow, 2022-01-17 The effort to surmount shame and formidable defenses in psychotherapy can trigger shame and self doubt in therapists Susan Warren Warshow offers a user friendly guide to help therapists move past common treatment barriers. Wrangham, 2019 Highly accessible authoritative and intellectually provocative a startlingly original theory of how Homo sapiens came to be Richard Wrangham forcefully argues that a quarter of a million years ago rising intelligence among our ancestors led to a unique new ability with unexpected consequences our ancestors invented socially sanctioned capital punishment facilitating domestication increased cooperation the accumulation of culture and ultimately the rise of civilization itself Throughout history even as quotidian life has exhibited calm and tolerance war has never been far away and even within societies violence can be a threat The Goodness Paradox gives a new and powerful argument for how and why this uncanny combination of peacefulness and violence crystallized after our ancestors acquired language in Africa a quarter of a million years ago Words allowed the sharing of intentions that enabled men effectively to coordinate their actions Verbal conspiracies paved the way for planned conflicts and most importantly for the uniquely human act of capital punishment. The victims of capital punishment tended to be aggressive men and as their genes waned our ancestors became tamer This ancient form of systemic violence was critical not only encouraging cooperation in peace and war and in culture but also for making us who we are Homo sapiens The Revolt Against Psychiatry Bonnie Burstow, 2019-08-20 A real eye opener this riveting anti critical psychiatry book is comprised of original cutting edge dialogues between Burstow an antipsychiatry theorist and activist and other leaders in the revolt against psychiatry including radical practitioners lawyers reporters activists psychiatric survivors academics family members and artists People in dialogue with the author include Indigenous leader Roland Chrisjohn psychiatrist Peter Breggin survivor Lauren Tenney and scholar China Mills The single biggest focus tension in the book is a psychiatry abolition position versus a critical psychiatry or reformist position In the scope of this project Burstow considers the ways racism genocide Indigeneity sexism media bias madness neurodiversity and strategic activism are intertwined with critical and antipsychiatry End the Madness of Mental Illness Marsha L.
