Horizons Canada Moves West Chapter 2:

Textile Horizons, 1986 **Restoration and Recovery of an Industrial Region** John M. Gunn, 2012-12-06 Sudbury Ontario is one of the world's most polluted areas. A century of industrial activities has resulted in thousands of acidified lakes and vast areas of denuded land. This book describes in a manner accessible to a wide audience the damage and the efforts at environmental restoration at Sudbury which resulted in its winning a United Nations award in 1992 for land reclamation. The book has been written by a distinguished group of contributors ranging from experts in acid rain and land reclamation to environmental engineers and toxicologists.

Engineering Geology and Geomorphology of Glaciated and Periglaciated Terrains J.S. Griffiths, C.J. Martin, 2017-10-18 The Engineering Group of the Geological Society Working Party brought together experts in glacial and periglacial geomorphology, Quaternary history, engineering geology and geotechnical engineering to establish best practice when working in former glaciated and periglaciated environments. The Working Party addressed outdated terminology and reviewed the latest academic research to provide an up-to-date understanding of glaciated and periglaciated terrains. This transformative state-of-the-art volume is the outcome of five years of deliberation and synthesis by the Working Party. This is an essential reference text for practitioners, students and academics working in these challenging ground conditions. The narrative style and a comprehensive glossary and photo catalogue of active and relict sediments, structures and landforms make this material relevant and accessible to a wide readership.

Spider Robert Sampson, 1987 **Before Canada** Allan Greer, 2024-07-12 Long before Confederation created a nation-state in northern North America, Indigenous people were establishing vast networks and trade routes. Volcanic eruptions pushed the ancestors of the Dene to undertake a trek from the present-day Northwest Territories to Arizona. Inuit migrated across the Arctic from Siberia, reaching Southern Labrador where they met Basque fishers from northern Spain. As early as the fifteenth century, fishing ships from western Europe were coming to Newfoundland for cod, creating the greatest transatlantic maritime link in the early modern world. Later, fur traders would take capitalism across the continent, using cheap rum to lubricate their transactions. The contributors to *Before Canada* reveal the latest findings of archaeological and historical research on this fascinating period. Along the way, they reframe the story of the Canadian past, extending its limits across time and space and challenging us to reconsider our assumptions about this supposedly young country. Innovative and multidisciplinary, *Before Canada* inspires interest in the deep history of northern North America.
