iNetSec 2009 - Open Research Problems in Network Security Jan Camenisch, Dogan Kesdogan, 2009-11-02 The working group WG 11 4 of IFIP ran an iNetSec conference a few times in the past sometimes together with IFIP security conference sometimes as a stand alone workshop with a program selected from peer reviewed submissions When we were elected to chair WG 11 4 we asked ourselves whether the security and also the computer science community at large bene ts from this workshop In particular as there are many too many security conferences it has become difficult to keep up with the eld After having talked to many colleagues far too many to list all of them here we decided to try a different kind of workshop one where people would attend to discuss open research topics in our eld as typically only happens during the co ee breaks of ordinary conferences To enable this we called for abstracts of 2 pages where the authors outline the open problems that they would like to discuss at the workshop the intent being that the author would be given 15 minutes to present the topic and another 15 minutes for discussion These abstracts were then read by all members of the Program Committee and ranked by them according to whether they thought this would lead to an interesting talk and discussion We then simply selected the abstracts that got the best rankings We were happy to see this result in many really interesting talks and discussions in the course of the workshop Of course these lively and direct discussions are almost impossible to achieve in a printed text Still we asked the authors to distill the essence of these discussions into full papers The results are in your hands

Improving Graphical User Interface Using TRIZ Umakant Mishra, 2009-12-01 The popularity of Graphical User Interface has made it indispensable not only in the field of computer but also in other consumer items like TV mobile phone camera etc Although the current day GUIs are way ahead of the GUIs of a decade ago various aspects of a GUI still have several limitations and are going through continuous innovations TRIZ provides various techniques like Ideality Functionality

Trends Contradictions Inventive Principles etc to solve the prior art problems and improve the capabilities of any product The concept of ideality is applied to explore the ideal features of a GUI such as easy to develop easy to operate easy to navigate better aesthetics increased speed of operation lesser errors and so on Many contradictions are faced on the way to achieve the Ideality such as displaying more visual elements but without expanding screen size scrolling the screen but without sacrificing space for the scrollbars customizing the GUI but without wasting user s time and effort to customize it etc This book cites more than 100 exemplary inventions from US Patent Database and illustrates how the contradictions in the prior art methods have been overcome by applying very simple but innovative concepts This book is intended to be a good reference for the TRIZ researchers GUI developers and IT inventors If you want to buy in bulk please email to umakant at trizsite dot tk for discounts

Interfaces between Science and Society Ângela Guimarães Pereira, Sofia Guedes Vaz, Sylvia Tognetti, 2017-09-08 The project of science has been to provide answers to questions about the world and how it works Often this lofty role has been characterised by a narrow and dogmatic scientific training an unwillingness to communicate to differing stakeholder needs a refusal to accept and to manage uncertainty complexity and value commitments and the reduction of knowledge assessment to colleague peer review on narrowly technical issues Times have changed As the world faces increasingly disparate challenges science is subjected to increasingly vehement demands from a society calling for transparency openness and public participation in science policy Science is going through an evolutionary

process Perhaps the most painful process it has ever encountered Research on the interfaces between science and society is a burgeoning area A new conception of knowledge now appears to be emerging based on the awareness of complexity uncertainty and a plurality of legitimate perspectives and interests Democracy is extending into the previously quite exclusive scientific realm and science must now submit to public scrutiny and participation in the governance of knowledge This book provides much needed reflections on the methods and tools for knowledge quality assurance particularly on its inputs to extended policy and decision making processes The overall aim is to improve the relationship between science and society The discussion involves six themes communicating between plural perspectives accepting and learning how to manage uncertainty complexity and value commitments acknowledging new conceptions of knowledge implementing transparency openness and participation in science policy valuing community based research and exploring how new ICT can support inclusive governance Taken together these themes provide both a framework and vision on how to conceive discuss and evaluate the changes that are occurring The chapters cover theory practice approaches experiences ideas and suggestions for a move beyond talking the talk to walking the walk Science and policy interfaces are dynamic processes needing to permanently redefine themselves and their roles This book contributes to the enrichment and deepening of our understanding of these important new trends in the social relations of science which are fundamental to our understanding of the prospects for further progress The book will be essential reading for scientists policy makers managers and the public
