Singh, Kyung Hwa Cho, 2021-01-27 This book provides a step by step methodology and derivation of deep learning algorithms as Long Short Term Memory LSTM and Convolution Neural Network CNN especially for estimating parameters with back propagation as well as examples with real datasets of hydrometeorology e g streamflow and temperature and environmental

science e.g. water quality. Deep learning is known as part of machine learning methodology based on the artificial neural network. Increasing data availability and computing power enhance applications of deep learning to hydrometeorological and environmental fields. However, books that specifically focus on applications to these fields are limited. Most of deep learning books demonstrate theoretical backgrounds and mathematics. However, examples with real data and step by step explanations to understand the algorithms in hydrometeorology and environmental science are very rare. This book focuses on the explanation of deep learning techniques and their applications to hydrometeorological and environmental studies with real hydrological and environmental data. This book covers the major deep learning algorithms as Long Short Term Memory (LSTM) and Convolution Neural Network (CNN) as well as the conventional artificial neural network model. *Environmental Science and Technology* Stanley E. Manahan, 2006-10-20. Formally established by the EPA nearly 15 years ago, the concept of green chemistry is beginning to come of age. Although several books cover green chemistry and chemical engineering, none of them transfer green principles to science and technology in general and their impact on the future. Defining industrial ecology. *Environmental Science and Technology* **Environmental Science: Foundations and Applications** Andrew Friedland, Rick Relyea, David Courard-Hauri, 2011-02-25. Watch a video clip and view sample chapters at www.whfreeman.com/friedlandpreview. Created for non-majors courses in environmental science, environmental studies, and environmental biology. *Environmental Science: Foundations and Applications* emphasizes critical thinking and quantitative reasoning skills. Students learn how to analyze graphs, measure environmental impact on various scales, and use simple calculations to understand key concepts. With a solid understanding of science fundamentals and how the scientific method is applied, students are able to evaluate information objectively and draw their own conclusions. The text equips students to interpret the wealth of data they will encounter as citizens, professionals, and consumers. *14th International Conference on Environmental Science and Development (ICESD2023)* Gordon Huang, Yongping Li, Changping Chen, Peng Zhang, 2024-10-19. This book is proposed to be a collection of excellently peer-reviewed research from the 2023 14th International Conference on Environmental Science and Development (ICESD 2023) which will be held during May 25-27, 2023, in Xiamen, China. ICESD 2023 will gather innovative academics and industrial experts to a common forum to facilitate the exchange of scientific information and its application in the field of Environmental Science and Sustainable Development. Particularly, a large amount of the research is related to the Water Governance Programme, which is an initiative as developed by the China International Center for Economic and Technical Exchanges, United Nations Development Programme, and Coca-Cola China. Recently, effects of energy crisis, water scarcity, environmental pollution, climate change, COVID-19 pandemic, and their interactions on the eco-environment and health have caused extraordinary risks in socio-economic and environmental systems. Such risks feature dynamic, uncertain, and interactive characteristics. In order to tackle these risks, cutting-edge technologies, including both experimental approaches and modeling ones, are desired urgently. Particularly, nature-based

solutions will be developed to help achieve net zero emission and United Nations Sustainable Development Goals In addition data driven and AI based methodologies will be developed to facilitate policy analysis of SEE under New Normal scenarios Furthermore the combinations of multiple approaches are expected to support the enhancement of SEE resilience in a post pandemic future Consequently ICESD 2023 will include presentations in the field of Water Resources Management Wastewater Treatment Drinking Water Safety Energy and Environmental Systems Analysis Air Pollution Control Solid Waste Management Sustainable Development Ecosystem Restoration Climate Change Adaptation and Socio economic and Environmental Management Excellent papers related to these topics would be enclosed in this proposed book Basics of Environmental Science and Sustainability - A Beginner's Guide Dr. Abhishek Chauhan, Dr. Rajni Verma, Ms. Arti Chouksey, Dr. Shalom Akhai, 2025-08-01 The environment is our shared home and understanding how to protect it is therefore very important This book Basics of Environmental Science and Sustainability A Beginner s Guide has been compiled to introduce readers to the fundamental concepts of environmental science in a clear and simple manner We believe that everyone regardless of age or background should be able to grasp the essential ideas behind environmental systems natural resources pollution sustainability and climate change The aim of this book is not just to inform but also to inspire responsible behavior and thoughtful decision making for a healthier planet This book covers various topics such as ecosystems biodiversity pollution environmental laws conservation and sustainable development It includes real world examples case studies and practical insights to help readers connect the theory with everyday life We have tried to make the content easy to understand and relevant for students educators and anyone interested in learning more about the environment We hope this guide serves as a stepping stone for young learners educators and environment conscious individuals who wish to make a positive impact in their communities Environmental awareness begins with education and this book is our small contribution toward a more sustainable and responsible future We express our heartfelt thanks to all those who supported the development of this book We also invite feedback and suggestions from readers for future improvements The Authors *Excel Senior High School*
