The Governance Gap Penelope Simons, Audrey Macklin, 2014-07-11 This book explores the persistence of the governance gap with respect to the human rights impacting conduct of transnational extractive corporations operating in zones of weak governance The authors launch their account with a fascinating case study of Talisman Energy's experience in Sudan informed by their own experience as members of the 1999 Canadian Assessment Mission to Sudan Harker Mission Drawing on new governance reflexive law and responsive law theories the authors assess legal and other non binding governance mechanisms that have emerged since that time including the UN Guiding Principles on Business and Human Rights They conclude that such mechanisms are incapable of systematically preventing human rights violating behaviour by

transnational corporations or of assuring accountability of these actors or recompense for victims of such violations The authors contend that home state regulation while not a silver bullet has a crucial role to play in regulating such conduct They pick up where UN Special Representative John Ruggie s Guiding Principles on Business and Human Rights left off and propose an innovative robust and adaptable template for strengthening the regulatory framework of home states Their model draws insights from the theoretical literature leverages existing public private transnational national soft and hard regulatory tools and harnesses the specific strengths of state based governance This book will be of interest to academics policy makers students civil society and business leaders

Circular Economy in Emergency Housing: Eco-Efficient Prototype Design for Subaşı Refugee Camp in Turkey and Maicao Refugee Camp in Colombia Pilar Mercader-Moyano,Paula Porras-Pereira,2023-07-04 In recent years there has been an upsurge in the number of forced displacements due to natural disasters armed conflicts and pandemics which has favoured an increase in the number of temporary accommodations Although the provision of shelter after an emergency situation is one of the priorities of humanitarian aid the reality is that the conditions in which people live in a situation of forced displacement are absolutely precarious and overcrowded Nowadays this type of housing tends to have a short lifespan deepening the environmental impact and the generation of waste Likewise added to this great problem is the linear economic

system implemented worldwide which also causes a high rate of waste This investigation develops an eco efficient design protocol that determines the basic premises in any emergency situation therefore avoiding the precarious nature to which those in forced displacement are exposed Moreover the research investigates different constructive solutions that can respond to situations of natural catastrophes or humanitarian disasters where emergency housing is needed as well as the possible alternatives from the point of view of circular economy Eco efficient and environmentally correct solutions are sought which can be adaptable to the different scenarios where emergency housing may be needed thus creating a rapid easy functional and environmentally correct architecture adaptable to these types of situations The study shows that the factors that characterize emergency architecture can be an example of where the issues around the sustainability factor are applied in a practical way The main objectives of this study are to develop an eco efficient design protocol which determines the basic premises in any emergency situation and to find eco efficient and environmentally correct solutions adaptable to different scenarios which have similar climatic characteristics and where emergency housing may be needed thus creating a type of ephemeral architecture but sensitive to the user to whom it is intended and in accordance with the optimal conditions of habitability Monthly List of Russian Accessions Library of Congress.
