## **Grade 12 Memorandum History P2013:**

*An Economic Historiography of Germany, 1918-1931* Giovanni B. Pittaluga, Elena Seghezze, 2024-12-09 Contrary to existing economic analyses of the Weimar Republic this book looks beyond the explanations of the individual events that characterized it in particular hyperinflation Br ning s fiscal policy and the 1931 crisis Instead it adopts a more unified approach and thereby sheds light on the underlying causes of these events The book argues that these individual events were the final result of economic processes and policy choices which had made it possible to mitigate the social and political conflict that would otherwise have undermined the Republic s existence Specifically it postulates that hyperinflation was the result of the persistent inflation which had permitted Germany to maintain low unemployment meet unions wage demands and contain left wing radicalism Similarly the banking and currency crisis of 1931 was caused by a sudden stop related to the high level of foreign debt incurred by Germany after the Dawes Plan Debt which had however enabled the country to finance the persistent external deficits resulting from its high domestic demand and large public expenditure incurred in an attempt to avoid social conflict The book reviews the various models and approaches proposed highlighting their relative strengths and weakness and concludes by providing a unifying common thread which explains how the dramatic economic events which characterized the Weimar Republic were the result of the very economic processes which had contributed to its temporary survival This book will appeal to students scholars economic researchers in general and more specifically to those interested in economic history monetary and financial economics economic policy political decision making and political economy in particular those seeking a better understanding of the Weimar Republic s economic history *Great Power Politics in the Fourth Industrial Revolution* Glenn Diesen, 2021-03-25 Why and how will the fourth industrial revolution impact great power politics Here Glenn Diesen utilizes a neoclassical approach to great power politics to assess how far the development of AI national and localized technological ecosystems and cyber warfare will affect great power politics in the next century The reliance of modern economies on technological advances Diesen argues also compels states to intervene radically in economics and the lives of citizens as automation radically alters the economies of tomorrow A groundbreaking attempt to contextualize the fourth industrial revolution and analyse its effects on politics and international relations

**Politics in Scotland** Duncan McTavish, 2016-06-23 Politics in Scotland is an authoritative introduction to the contemporary political landscape in Scotland and an essential text for undergraduate and postgraduate students of Scottish Politics Written by leading experts in the field it is coherently organised to provide a clear and comprehensive overview of a range of themes in contemporary Scottish Politics Key topics include Government and electoral behaviour Representation and political parties in Scotland Public policy and Scotland s relationship with the rest of the world Scottish politics both in the run up to and after the 2014 referendum The Future of Scottish government and politics This textbook will be essential reading for students of Scottish politics British Politics devolution government and policy Asymmetric Crisis in Europe

and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics

**Entrepreneurship and Global Cities** Nikolai Mouraviev, Nada K. Kakabadse, 2019-05-29 Global cities with a largely cosmopolitan environment such as Auckland Berlin Dubai London New York Shanghai or Singapore are successfully developing and attracting entrepreneurs from all over the world This book elucidates the policy approaches related to the formation of the cosmopolitan environment that supports entrepreneurship in large urban areas The book's core theme is the relationship between cosmopolitanism and entrepreneurship with the latter viewed as a key driver of economic growth sustainability and prosperity The book argues that successful entrepreneurship rests on the two pillars of the cosmopolitan environment diversity and the creation of business opportunities In contrast to globalisation's standardised solutions in policy commerce banking and social issues cosmopolitanism allows individualised value and solutions whereby actors entrepreneurs businesses families interest groups governments non governmental organisations and virtual communities enjoy diversity as a norm The book pays special attention to under researched topics such as threats to sustainability in cosmopolitan cities why cosmopolitan cities attract immigrants with a highly independent mindset the impact of religious norms on female and male entrepreneurs varying experiences of local and expatriate entrepreneurs and the differences in doing business by female entrepreneurs stemming from their nationalities and residence status The book offers conceptual insights into the enablers of entrepreneurship in cosmopolitan cities and urban governance complemented by case studies based on fieldwork in Dubai Hamburg Istanbul Karachi Kyiv London Moscow and Tel Aviv The book will appeal to those who study or teach cosmopolitanism globalisation or urban development concepts and those professionals who are considering the possibility of doing business or working as an expatriate in a cosmopolitan city
