

Elements of Visual Image Interpretation

- Visual interpretation involves visual analysis of aerial photographs and satellite images. When the interpretation is carried out with the help of computer software, it is known as digital interpretation.
- Visual image interpretation is a process of identifying features seen on the images by an analyst/interpreter and communication of information obtained from these images to others for evaluating their significance. This process, however, is not restricted to making decisions concerning what objects appear in images but it also includes determination of their relative locations and extents.

Treaty Interpretation Under the Vienna Convention on the Law of Treaties Chang-fa Lo, 2017-10-31 This book is devoted to an idea of a second round of codification of certain new rules for treaty interpretation. Currently, treaty interpretation is guided by Articles 31 through 33 of the Vienna Convention on the Law of Treaties (VCLT). The fundamental rule is that a treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose. These rules lay the foundation for treaty interpretation. They represent the first round of codification of the contents of some previous customary international law rules. The book argues that the current rules are overly simplified. After almost fifty years of codification of the VCLT, the codified text in it is practically insufficient in addressing some traditional treaty interpretation issues such as the interpretation involving time factors or technology development and in coping with some new development of international law such as the diversification and fragmentation of international treaties and new challenges such as the need of coordination between different treaties and the need of introducing external values including human rights into a treaty through treaty interpretation process. The book further argues that there is a need to have a second round of codification so as to incorporate new rules into the VCLT to be followed by treaty interpreters to make treaty interpretation more consistent and transparent and more in line with the shared value of international community. The book proposes the contents of certain new rules to be considered as the new codified rules for treaty interpretation.

Other Income under Tax Treaties

Alexander Bosman, 2015-09-23 Bilateral tax treaties are often to a greater or lesser extent based on the OECD Model Convention. Among the distributive rules with respect to taxation of income which are laid down in Chapter III of that model, Article 21 assigns the tax jurisdiction in respect of other income understood to mean items of income which are not dealt with in other provisions of the tax treaty to the residence state in accordance with the main rule underlying the OECD Model, thus ensuring that no income falls outside the scope of the treaty. This study provides a comprehensive analysis of Article 21 of the OECD Model in extensive detail and with reference to case law from a number of jurisdictions and to statements of various authorities and official documents; the author shows how Article 21 operates in relation to the other distributive rules of the OECD Model and bilateral tax treaties based thereon. The analysis considers such items of income as the following in

relation to Article 21 income from immovable property business profits profits from shipping inland waterways transport and air transport dividends interest and royalties capital gains and income from employment In addition the author examines the significance of the OECD Commentaries for the interpretation of tax treaties the other income article in other model conventions and notable deviations from Article 21 among bilateral tax treaties An appendix offers well grounded recommendations on how to potentially amend the wording of Article 21 and the related commentary and how the application of the article can be improved Although underexposed in the tax law literature heretofore the other income article raises important international taxation issues that remain problematic or unresolved Tax lawyers government officials and other interested professionals will find here a penetrating analysis that goes a long way towards clarifying the characterisation of income that resists the standard categories defined in tax treaties
