Extraordinary Means Robyn Schneider, 2015-06-04 John Green's *The Fault in Our Stars* meets Rainbow Rowell's *Eleanor & Park* in this darkly funny novel from the critically acclaimed author of *The Beginning of Everything*. Up until his diagnosis, Lane lived a fairly predictable life. When he's sent to Latham House, a boarding school for sick teens, Lane thinks his life may as well be over. But when he meets Sadie and her friends, a group of eccentric troublemakers, he realises that maybe getting sick is just the beginning. That illness doesn't have to define you, and that falling in love is its own cure. Robyn Schneider's *Extraordinary Means* is a heart-wrenching yet ultimately hopeful story about true friendships, ill-fated love, and the rare miracle of second chances. Praise for *Extraordinary Means*: This captivating book about life, death, fear, and second chances will fly off the shelves. VOYA: Schneider's subtlety combined with themes about learning to live life fully makes this an easy recommendation for those seeking titles similar in premise to John Green's *The Fault in Our Stars*. School Library Journal: The perfect read next for fans of the sick-lit trend and readers looking for a tear-stained romance. Bulletin of the Center for Children's Books: Fans of John Green's blockbuster *The Fault in Our Stars* who are eager for more of that kind of story will likely be satisfied.

Theory MCQ *Circuits, Packets, and Protocols* James L. Pelkey, Andrew L. Russell, Loring G. Robbins, 2022-04-19 As recently as 1968, computer scientists were uncertain how best to interconnect even two computers. The notion that within a few decades the challenge would be how to interconnect millions of computers around the globe was too far-fetched to contemplate. Yet by 1988 that is precisely what was happening. The products and devices developed in the intervening years, such as modems, multiplexers, local area networks, and routers, became the linchpins of the global digital society. How did such revolutionary innovation occur? This book tells the story of the entrepreneurs who were able to harness and join two factors: the energy of computer science researchers supported by governments and universities, and the tremendous commercial demand for internetworking computers. The centerpiece of this history comes from unpublished interviews from the late 1980s with over 80 computing industry pioneers, including Paul Baran, J. C. R. Licklider, Vint Cerf, Robert Kahn, Larry Roberts, and Robert Metcalfe. These individuals give us unique insights into the creation of multi-billion-dollar markets for computer communications equipment, and they reveal how entrepreneurs struggled with failure, uncertainty, and the limits of knowledge.
