This book takes a fresh look at programs for advanced studies for high school students in the United States with a particular focus on the Advanced Placement and the International Baccalaureate programs and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty and the educational research community with a detailed assessment that can be used to guide change within advanced study programs. **The Algebra Miracle: The True Story of a High-Poverty School's Triumph in the Age of Accountability** Stuart Alan Singer, 2012-02-21. A miracle is defined as a highly improbable or extraordinary accomplishment. The story of the Algebra program at JEB Stuart High School in Fairfax Virginia qualifies for such a designation. Over a period of fifteen years, a series of ambitious, no-cost innovations which challenged the prevailing status quo in math education led to a set of academic accomplishments that were indeed improbable and extraordinary. This miracle was achieved by a high-poverty, ethnically diverse student body that was unique at the time but is now representative of schools found throughout the U.S. For everyone touched by education, from parents and students to teachers and administrators, The Algebra Miracle will provide insights into the complexity of finding a low-cost formula for academic success in the tight budgetary times of the 21st century. This story serves as a model of what can be accomplished when a dedicated school staff commits its time, energy and creativity to the needs of their students. Survive the IB! Nathan Taber, 2011. **IB World Schools Yearbook 2011** Wendy Bosberry-Scott, 2011. This yearbook is the official guide to schools offering the International Baccalaureate Diploma, Middle Years and Primary Years programmes. It tells you where the schools are and what they offer and provides up-to-date

information about the IB programmes and the International Baccalaureate Organization **The Unorthodox Guide to Getting A In Math Exams** Chew Sze Chong, 2019-05-08 After tutoring more than 50 students for Advanced Level Mathematics on a one to one basis since 2013 in Singapore a Singapore math home tutor discovers what differentiates students who are successful at math from those who don't. The key differentiator is the individual student's approach to study and this book explains those that work as well as those that inhibit the student's potential to do well. The tutor also shares his personal approach of learning math that helped him get A for math exams all the way from Primary School to Junior College.
