**Environmental Studies and Climate Change** R C Sobti, Sandeep K. Malhotra, Kamal Jaiswal, Sanjeev Puri, 2022-12-13. Currently anthropogenic activities have caused unprecedented destruction of the environment at alarming rates leading to undesirable alterations in air, land and water. The process of environment degradation has been accelerated by industrial processes which result in waste as well as over consumption of natural resources. The ecological balance has been disturbed and resources have shrunk. All this has resulted in climate change which has emerged as a major concern in the 21st century. Changes in the environment are driven by demand for energy, water and food to raise the standard of living. These are also responsible for climate change with contributions from deforestation and CO<sub>2</sub> emissions from fossil fuels such as coal and petroleum. The present volume discusses some of the main issues regarding environmental degradation and the causes as well as the impact of climate change which is impacting the ecosystem. The effects of various pollutants, causes of climate change with case studies on geochemistry and glaciers etc. and measures to reduce the impact on biodiversity, health etc. are discussed in detail in its chapters. In a nutshell, this volume discusses in detail the following issues: Anthropogenic and natural factors in environmental degradation; Climate change history, causes and threats to abiotic and biotic systems; Case studies on the impact of climate change and living systems; Mitigation and preparedness for the future.

The Smart Cyber Ecosystem for Sustainable Development Pardeep Kumar, Vishal Jain, Vasaki Ponnusamy, 2021-09-08. The Smart Cyber Ecosystem for Sustainable Development. As the entire ecosystem is moving towards a sustainable goal, technology-driven smart cyber system is the enabling factor to make this a success and the current book documents how this can be attained. The cyber ecosystem consists of a huge number of different entities that work and interact with each other in a highly diversified manner. In this era when the world is surrounded by many unseen challenges and when its population is increasing and resources are decreasing, scientists, researchers, academicians, industrialists, government agencies and other stakeholders are looking toward smart and intelligent cyber systems that can guarantee sustainable development for a better and healthier ecosystem. The main actors of this cyber ecosystem include the Internet of Things (IoT), artificial intelligence (AI) and the mechanisms providing cybersecurity. This book attempts to collect and publish innovative ideas, emerging trends, implementation experiences and pertinent user cases for the purpose of serving mankind and societies with sustainable societal development. The 22 chapters of the book are divided into three sections. Section I deals with the Internet of Things. Section II focuses on

artificial intelligence and especially its applications in healthcare whereas Section III investigates the different cyber security mechanisms Audience This book will attract researchers and graduate students working in the areas of artificial intelligence blockchain Internet of Things information technology as well as industrialists practitioners technology developers entrepreneurs and professionals who are interested in exploring designing and implementing these technologies

**Educational Psychology Practice** Thomas Szulevicz, Lene Tanggaard, 2016-09-20 This book sets out a proposal for applying psychological and educational psychology concepts to improve work with children and young people It also suggests how some of the criticism aimed at pedagogical psychology practice can be answered In several respects educational psychology practice seems to be in a transition phase and could even be said to be suffering an identity crisis educational establishments and education policy alike are looking for different skills than those the psychology profession traditionally provides and people are generally questioning the relevance and applicability of pedagogical psychological counseling The book is based on the fundamental premise that good professional practice is contingent upon circumstances that allow practitioners to apply their knowledge experience and skills in the specific encounter with a specific task This means that the ability to act pragmatically and creatively is and will increasingly be an important skill not only for educational psychologists but also for psychologists in general In other words psychologists must be able to contribute to tasks in new ways and new contexts when required Intended primarily for students of psychology school psychologists and other professional groups that provide counseling in schools the book is also a valuable resource for the various groups that use pedagogical psychology tools and insights in their work with children and young people
