- 1) **Thompson (1984) defines five categories** for the process of spreading diffusion from the origin. **Source** is the starting location; **transmission** is what the person who carries the information is doing; **link** is the path; **the original node** and **preexisting network** is the only node with a point source and preexisting network (network).
- 2) **Thompson (1984) describes diffusion** as movement on the basis of **top or bottom of the political**. (the first scenario goes through an individual from the top down; the second is the opposite)
- 3) **Make this point relevant** to the context of your study, open up the door to future in the space (prevalence over the time span) of the first scenario
- 4) **Focus your analysis** on a specific political issue or a specific level of analysis (country or govt.)
- 5) **Include any relevant variables** and **change from** the process of spreading from left to right, bottom to top, or otherwise
- 6) **Compare** the results from examining the full network with examining the full network. **They will** compare the results from examining the full network with examining the full network.

**Abstract:** The purpose of this study was to determine the effect of a 12-week, low-intensity, low-impact, and low-volume exercise program on the physical fitness of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were randomly assigned to either an exercise group or a control group. The exercise group performed a 12-week, low-intensity, low-impact, and low-volume exercise program. The control group did not exercise. The subjects were assessed for physical fitness at baseline and at 12 weeks. The results of the study showed that the exercise group had significantly higher levels of physical fitness at 12 weeks compared to the control group. The exercise program was effective in improving physical fitness in sedentary, middle-aged women.
