*Encyclopedia of Body Adornment* Margo DeMello, 2007-08-30 People everywhere have attempted to change their bodies in an effort to meet their cultural standards of beauty as well as their religious and or social obligations Often times this modification or adornment of their bodies is part of the complex process of creating and re creating personal and social identities Body painting has probably been practiced since the Paleolithic as archaeological evidence indicates and the earliest human evidence of tattooing goes back to the Neolithic with mummies found in Europe Central Asia the Andes and the Middle East Adornments such as jewelry have been found in the earliest human graves and

bodies unearthed from five thousand years ago show signs of intentional head shaping It is clear that adorning and modifying the body is a central human practice Over 200 entries address the major adornments and modifications their historical and cross cultural locations and the major cultural groups and places in which body modification has been central to social and cultural practices This encyclopedia also includes background information on the some of the central figures involved in creating and popularizing tattooing piercing and other body modifications in the modern world Finally the book addresses some of the major theoretical issues surrounding the temporary and permanent modification of the body the laws and customs regarding the marking of the body and the social movements that have influenced or embraced body modification and those which have been affected by it All cultures everywhere have attempted to change their body in an attempt to meet their cultural standards of beauty as well as their religious and or social obligations In addition people modify and adorn their bodies as part of the complex process of creating and re creating their personal and social identities Body painting has probably been practiced since the Paleolithic as archaeological evidence indicates and the earliest human evidence of tattooing goes back to the Neolithic with mummies found in Europe Central Asia the Andes and the Middle East Adornments such as jewelry have been found in the earliest human graves and bodies unearthed from five thousand years ago show signs of intentional head shaping It is clear that adorning and modifying the body is a central human practice Over 200 entries address the major adornments and modifications their historical and cross cultural locations and the major cultural groups and places in which body modification has been central to social and cultural practices This encyclopedia also includes background information on the some of the central figures involved in creating and popularizing tattooing piercing and other body modifications in the modern world Finally the book addresses some of the major theoretical issues surrounding the temporary and permanent modification of the body the laws and customs regarding the marking of the body and the social movements that have influenced or embraced body modification and those which have been affected by it Entries include acupuncture amputation Auschwitz P T Barnum the Bible body dysmorphic disorder body piercing branding breast augmentation and reduction Betty Broadbent castration Christianity cross dressers Dances Sacred and Profane Egypt female genital mutilation foot binding freak shows genetic engineering The Great Omi Greco Roman world henna infibulation legislation regulation lip plates medical tattooing Meso America military tattoos National Tattoo Association nose piercing obesity permanent makeup primitivism prison tattooing punk rites of passage scalpelling silicone injections Stalking Cat suspensions tanning tattoo reality shows tattooing Thailand transgender tribalism

**Clinical Management of Shock**

Stanislaw P. Stawicki, Mamta Swaroop, 2020-06-24 Shock is a physiological state of war From a healthcare provider perspective the word shock is associated with a mixed array of feelings including dread well founded fear and deep respect The physiological state of shock is well recognized for the associated destructive consequences and its successful management requires prompt identification immediate action and sustained effort by all members of the healthcare team

This mindset of advanced preparation and constant readiness constitutes the foundation of the modern approach toward shock early detection and prompt treatment for optimal outcomes. Despite the heterogeneity of shock as a clinico pathological entity, there are some common threads that permeate all forms and manifestations of shock. With apparent increase in observed commonalities in the more advanced and often irreversible stages of the systemic syndrome, when faced with shock, the body and its systems do their best to compensate for the maldistribution of oxygen and nutrients. This is known as the so called compensated shock. Beyond that, the body loses its ability to adjust any further, thus descending into uncompensated shock with a refractory state characterized by vasoplegia and irreversible cardiovascular failure. As the reader journeys through the chapters of the book, he or she will read about various biomarkers and endpoints of resuscitation, explore different types of shock, e.g. septic, hemorrhagic, anaphylactic, and learn about some of the less often discussed topics such as neurogenic and spinal shock, as well as the amniotic fluid embolism. Our goals were to keep things clinically relevant and practically oriented, thus enabling the reader to apply the newly acquired knowledge in their everyday clinical routines. As the reader progresses through the book, we hope to help stimulate further discourse and innovative thinking about the topic. In this context, it is critical that basic translational and clinical research on shock continues to advance. Only through ongoing scientific progress can we help improve outcomes for patients with both rare and common forms of shock.
