

Lesson Outline**LESSON 1****Gravity and Friction****A. Types of Forces**

1. A push or a pull is called a(n) force.
2. A(n) contact force is a push or a pull on an object by another object that is touching it.
3. A force that one object can apply to another object without touching it is a(n) noncontact force.
4. Gravity, magnetic force, and electric forces are examples of noncontact forces.
5. Forces have strength and direction.
6. An arrow can be used to show a force; the length shows the strength of the force, and the direction of the arrow shows the direction of the force.
7. Forces are measured in units called Newton(N).

B. What is gravity?

1. Mass is the amount of matter in an object.
2. Gravity is an attractive force that exists between all objects that have mass.
3. Mass is often measured in kilograms(kg).
4. According to the law of universal gravitation, all objects are attracted to one another with a gravitational force that is proportional to the mass of the objects and the distance between them.
 - a. When the mass of one or both objects increases, the gravitational force between the objects increase.
 - b. When the distance between two objects increases, the attraction between the objects decrease.
5. weight is the gravitational force exerted on an object.
 - a. Near Earth's surface, an object's weight is the gravitational force exerted on the object by Earth.
 - b. The weight of an object on Earth decreases significantly only when the object moves a great distance away from Earth.
