**Advances in Modeling and Management of Urban Water Networks** Alberto Campisano, Enrico Creaco, 2021-01-06  
The Special Issue on Advances in Modeling and Management of Urban Water Networks UWNs explores four important topics of research in the context of UWNs asset management modeling of demand and hydraulics energy recovery and pipe burst identification and leakage reduction In the first topic the multi objective optimization of interventions on the network is presented to find trade off solutions between costs and efficiency In the second topic methodologies are presented to simulate and predict demand and to simulate network behavior in emergency scenarios In the third topic a methodology is presented for the multi objective optimization of pump as turbine PAT installation sites in transmission mains In the fourth topic methodologies for pipe burst identification and leakage reduction are presented As for the urban drainage systems UDSs the two explored topics are asset management with a system upgrade to reduce flooding and modeling of flow and water quality with analyses on the transition from surface to pressurized flow impact of water use reduction on the operation of UDSs and sediment transport in pressurized pipes The Special Issue also includes one paper dealing with the hydraulic modeling of an urban river with a complex cross section Water Studies C. A. Brebbia, 2018-03-27 Comprising specially selected papers this book presents trans disciplinary research on issues related to the nature of water and its use and exploitation by society The valuable research contained in this book demonstrates the need to bridge the gap between physical biological environmental and health sciences Water is essential for sustaining life on our planet nevertheless its unequal distribution is a source of permanent conflict It is predicted that population growth and irregular rainfall due to climate change may lead to more restricted access to water in certain regions of the world This problem is made even more severe by human actions that can cause degradation to nature and the environment The availability of clean and inexpensive water can no longer be taken for granted as the need for water continues to increase due a growing global population Heavy water consumers such as agriculture and industry often contribute to its contamination Water distribution networks in urban areas and soiled water collection systems present serious problems as well as the need to maintain ageing infrastructures Possible technologically solutions such as desalination or pumping systems are energy demanding but as costs rise the techniques currently developed may need to be re assessed Sacred Violence D. Jones, M. Rainsborough, M.L.R Smith, 2014-08-05 Sacred Violence and Religious Violence examines the place that ideology or political religion plays in legitimizing violence to bring about a purer world In particular the book examines Islamism and the western secular liberal democratic responses to it Encyclopedia of Astronomy & Astrophysics P Murdin, 2001-01-01 In a unique collaboration Nature Publishing Group and Institute of Physics Publishing have published the most extensive and comprehensive reference work in astronomy and astrophysics This unique resource covers the entire field of astronomy and astrophysics and this
