Autism Spectrum Disorder ASD odds are that students on the spectrum will be in many classrooms across every subject area

Seeing the Spectrum argues that secondary English teachers are uniquely equipped to prepare students with autism for future success both in school and in life. Writing for preservice and current English language arts teachers, Robert Rozema offers practical evidenced-based strategies for teaching literature, informational texts, writing, and communication to students on the spectrum. These strategies are appropriate for inclusive classrooms with both neurotypical students and students with autism. The final chapter includes a complete unit plan on *Of Mice and Men* illustrating how curriculum focused on commonly taught literary works can be reimagined to accommodate the needs and draw on the strengths of students on the spectrum. I appreciate this book. I appreciate the gift Robert Rozema has given me. My thinking and teaching will now be more diverse, more consciously competent, more compassionate, and therefore more vital.

From the Foreword by Jeffrey D. Wilhelm, distinguished professor of English Education, Boise State University, and author of *You Gotta Be the Book*. *Seeing the Spectrum* examines real young people and daily classroom interactions to help teachers better understand the mental and emotional processing of their autistic spectrum students and devise assignments to scaffold their success. Rozema knows what matters in English reading: literature, developing empathy, understanding complex ideas and interpersonal relationships, writing to express complicated ideas. The diverse tools, strategies, and ideas he describes foster inclusiveness, compassion, and success for all students.

Allen Webb, professor of English, Western Michigan University. [Research in Young Children's Literacy and Language Development](#)

Olivia N. Saracho, 2019-12-13. The importance of the early years in young children's lives and the rigid inequality in literacy achievement are a stimulating backdrop to current research in young children's language and literacy development. This book reports new data and empirical analyses that advance the theory of language and literacy with researchers using different methodologies in conducting their study with both a sound empirical underpinning and a captivating analytical rationalization of the results. The contributors to this volume used several methodological methods, e.g., quantitative, qualitative, to describe the complete concept of the study, the achievement of the study, and the study in an appropriate manner based on the study's methodology. The contributions to this volume cover a wide range of topics, including dual language learners, Latino immigrant children, children who have hearing disabilities, parents' and teachers' beliefs about language development, early literacy skills of toddlers and preschool children, interventions, multimodalities in early literacies, writing, and family literacy. The studies were conducted in various early childhood settings, such as child care, nursery school, Head Start, kindergarten, and primary grades, and the subjects in the studies represent the pluralism of the globe, a pluralism of language backgrounds, ethnicity, abilities, and disabilities. This book was originally published as a special issue of *Early Child Development and Care*.
