customer profitability four times more profit than expected whereas customers in the bottom 80% generate only 20% one fourth as much as expected This means the 20% most profitable customers tend to be 16 times more profitable than the 80% least profitable customers In order to capitalize on the Pareto principle a business should 1 segment its customers by their profitability 2 distinguish the top 20% of its customers in top market segment from the bottom 80% of the customers in the bottom market segment and 3 target the top market segment with its marketing strategies The purpose of this book is to show business students and executives how to implement this process and thereby achieve the predicted results *The Essentials of Marketing Principles* James E.
