**Congressional Primary Elections** Robert G. Boatright, 2014-08-21 Congressional primaries are increasingly being blamed for polarization and gridlock in Congress Most American states adopted congressional primaries during the first decades of the 20th century as a means of breaking the hold of political bosses on the nomination of candidates Yet now many contend that primaries have become a means by which the most dedicated party activists choose candidates unrepresentative of the electorate and so general election voters are forced to choose between two ideologically extreme candidates Consequently there have been recent instances in both parties where nominees were chosen who were clearly not preferred by party leaders and who arguably lost elections that their parties should have won This book is the first to focus solely upon congressional primary elections and to do so for a student readership Boatright organizes his text around the contention that there are important differences between types of primaries and these differences prevent us from making blanket statements about primary competition He focuses on explanations of two sources of difference differences in electoral structure and differences brought about by the presence or absence of an incumbent seeking reelection The first three chapters introduce these differences explore how they came to exist and outline some of the strategic considerations for candidates parties interest groups and voters in primary elections The subsequent four chapters explore different types of primary elections and the final chapter evaluates actual and proposed primary reforms Congressional Primary Elections is the first book to provide a history and analysis of congressional primary elections and will serve as a crucial part of courses on political parties and campaigns and elections The book gives students the tools for understanding arguments for and against the reform of primary elections and for understanding the differences between types of primaries

institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike
