The Relationship between Student Achievement and Multilingualism: A Quantitative Causal-Comparative Study Jennifer Thomson, 2011-05-15 Multilingualism enhances cognitive neuro linguistic and meta linguistic development It is proposed that improved student performance might be achieved if the U S educational system mainstreamed foreign language teaching as early as elementary school The research hypothesis of this quantitative causal comparative study was therefore that multilingual students should achieve significantly higher scores in standardized tests of basic skills relative to monolingual students Simple random samples of 500 monolingual and 500 multilingual students in grades 5 through 8 with similar socio economic status were drawn There was a significant difference between the combined scores of the monolingual and multilingual students indicating higher multilingual scores The results of this and other studies should influence educational policy on language teaching Urgent action is demanded from educational administrators and curriculum specialists to make foreign language teaching an integral part of the curriculum The TurnAround ToolKit Lynn Winters, Joan Herman, 2010-12-07 The TurnAround Toolkit outlines a formative evaluation program for enhancing school and student achievement Included are pocket summaries for each chapter and an online toolkit Learning and Understanding National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Programs for Advanced Study of Mathematics and Science in American High Schools, 2002-09-06 This book takes a fresh look at programs for advanced studies for high school students in the United States with a particular focus on the Advanced Placement and the International Baccalaureate programs and asks how advanced studies can be significantly improved in general It also examines two of the core issues surrounding these programs they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs this report provides teachers parents curriculum developers administrators college science and mathematics faculty and the educational research community with a detailed assessment that can be used to guide change within advanced study programs **Resources in Education** , 2001-10 **Developing a Schoolwide Framework to Prevent and Manage Learning and Behavior Problems** Kathleen Lynne Lane, Holly Mariah Menzies, Wendy Peia Oakes, Jemma Robertson Kalberg, 2019-11-13 Now revised and expanded this volume explains how to design implement and evaluate a comprehensive integrated three tiered Ci3T model of prevention Rather than presenting a packaged program the book provides resources and strategies for designing and tailoring Ci3T to the needs and priorities of a particular school or district community Ci3T is unique in integrating behavioral academic and social emotional components into a single research based framework User friendly features include tools for collecting and using student and schoolwide data guidance for selecting effective interventions at each tier detailed case examples and tips for enhancing collaboration between general
