T-Kit 14 - Value-based learning in mobility projects Snežana Bačlija Knoch,Sérgio Gonçalves,Susie Nicodemi,2022-05-18 Promote value based education in general and in learning mobility in the youth field in particular Learning mobility in the youth field is increasingly recognised and present in European programmes and in the activities and initiatives supported by the European Union the Council of Europe and other institutions Providing a meeting place for people from different environments and communities learning mobility programmes draw attention to

values trigger reflections on them and stimulate questioning and critical examination If prepared and facilitated well these experiences can contribute to preparing and supporting young people and adult learners to be active in society and to be agents of change This T Kit has been written by and is for facilitators of learning to help start their thinking process about an important but also complex topic It aims to promote value based education in general to explain it and with practical examples related to specific values show how it can be used It is framed within the current policy framework of the Council of Europe and the European Union including their youth mobility programmes The T Kit should be understood through a holistic learning and non formal education approach the combination of theory background information examples and some practical ideas should help to initiate reflection from the relatively new angle of value based education in learning mobility in the youth field Value based learning is not neutral and neither is the T Kit Value based learning in mobility projects It is rooted in a set of values that it explores promotes and encourages action based on them To support this process the T Kit is divided into two parts one conceptual and one practical The conceptual part lays the foundation for value based learning in mobility while the practical part encompasses concrete activities and thought provokers which address the dilemmas and questions that can arise when implementing activities , Wired For Wellness Andrew G. Gibson, In Wired for Wellness readers will explore the complex relationship between technology well being and human connection in the digital age This essential guide delves into the addictive nature of our devices the impact of dopamine on our engagement and the ways in which technology can contribute to feelings of isolation anxiety and depression But Wired for Wellness doesn t just highlight the challenges of the digital age it also provides practical and actionable strategies for harnessing technology s power for good Through mindfulness intentionality and compassion readers will learn how to set boundaries manage screen time and foster genuine human connections in an increasingly virtual world Wired for Wellness blends cutting edge research personal stories and expert insights to empower readers to reclaim their well being and create a more balanced and fulfilling life

Ubuntu and Buddhism in Higher Education David Robinson-Morris, 2018-10-26 *Ubuntu and Buddhism in Higher Education* theorizes the equal privileging of ontology and epistemology towards a balanced focus on being becoming and knowledge acquisition within the field of higher education In response to the shift in higher education s aims and purposes beginning in the latter half of the 20th century this book reconsiders higher education and Western subjectivity through southern African Ubuntu and Eastern Buddhist onto epistemologies By mapping these other than West ontological viewpoints onto the discourse surrounding higher education this volume presents a vision of colleges and universities as transformational institutions promoting our shared connection to the human and non human world and deepens our understanding of what it means to be a human being **The Wheels of Soul in Education** , 2010-01-01 This book boldly re frames the basis of our collective approach to education It presents a compelling argument for an educational world view that perceives self society and the universe as an undivided whole a holarchy of wholes within wholes wheels within wheels

Soul in education is an international movement rooted in the holistic education paradigm. It challenges us individually and collectively to re-ensoul our educational thinking and practice from the inside out. At the heart of this educational world view is an appreciation of the spiritual presence of the soul as the source self that exists beyond the surface appearance of personality and infuses an individual with positive transformative qualities that energise lifelong learning and creative living. The essays in this book describe practices that attend to the cultivation of the soul in a range of educational contexts. Written by holistic educators from around the globe, they build a picture of education that develops a multidimensional understanding of self and other. Through creativity, paradox and mystery, teachers invite the emergence of soul qualities in themselves and learners' qualities such as joy, justice, caring, ethics, compassion and tolerance, providing the vital basis for the creation of a more equitable social reality in the 21st century and beyond.

Digital Humanities in the India Rim Hart Cohen, Ujjwal Jana, Myra Gurney, 2024-11-06

This varied collection delves into illuminating examples of Digital Humanities research and practice currently being undertaken by academics in India and Australia and seeks to understand the shared challenges as well as the points of similarity and difference between them. From the influence of Netflix on International Relations to contemporary digital adaptations of Mary Shelley's *Frankenstein* via detours into robotics, empathic robots and the cultural specificity of online dating, these essays convey the distinctive breadth and imagination of research in this field. Digital Humanities is a relatively new discipline in the India Rim and this novelty has created space for innovative research ideas as well as the use of traditional methodologies and software in different ways within these unique cultural spaces that could potentially influence how Digital Humanities is conceptualised internationally. For example, drawing on Indian classical logic leads to novel designs and applications of computation. This lively volume offers a fresh look at the Digital Humanities and an important overview of the work taking place in a region other than the Western countries that typically dominate the field. It has much to offer both experienced researchers and those new to the Digital Humanities.

AI in Learning, Educational Leadership, and Special Education: Innovations and Ethical Dilemmas Efstratopoulou, Maria, Argyriadi, Agathi, Argyriadis, Alexandros, 2025-08-06

Artificial intelligence (AI) transforms the educational landscape, offering powerful tools to enhance learning, streamline leadership tasks and support students with special needs. In learning environments, AI-driven platforms personalize instruction, adapt to diverse student needs and offer real-time feedback, making education more efficient and engaging. In special education, AI technologies such as speech recognition, predictive analytics and adaptive interfaces create new opportunities for inclusive learning. However, these innovations also raise critical ethical dilemmas, including concerns over data privacy, algorithmic bias and equitable access. As AI evolves further, research may ensure organizations harness its potential responsibly and ethically. *AI in Learning, Educational Leadership, and Special Education: Innovations and Ethical Dilemmas* explores the integration of intelligent technologies in education practices.
