*Empire and Modern Political Thought* Sankar Muthu, 2012-09-17 This collection of original essays by leading historians of political thought examines modern European thinkers' writings about conquest, colonization, and empire. The creation of vast transcontinental empires and imperial trading networks played a key role in the development of modern European political thought. The rise of modern empires raised fundamental questions about virtually the entire contested set of concepts that lay at the heart of modern political philosophy, such as property, sovereignty, international justice, war, trade, rights, transnational duties, civilization, and progress. From Renaissance republican writings about conquest and liberty to sixteenth-century writings about the Spanish conquest of the Americas, through Enlightenment perspectives about conquest and global commerce, and nineteenth-century writings about imperial activities both within and outside of Europe, these essays survey the central moral and political questions occasioned by the development of overseas empires and European encounters with the non-European world among theologians, historians, philosophers, diplomats, and merchants. *European Elites and Ideas of Empire, 1917-1957* Dina Gusejnova, 2016-06-16 Who thought of Europe as a community before its economic integration in 1957 Dina Gusejnova illustrates how a supranational European mentality was forged from depleted imperial identities In the revolutions of 1917 to 1920 the power of the Hohenzollern Habsburg and Romanoff dynasties over their subjects expired Even though Germany lost its credit as a world power twice in that century in the global cultural memory the old Germanic families remained associated with the idea of Europe in areas reaching from Mexico to the Baltic region and India Gusejnova s book sheds light on a group of German speaking intellectuals of

aristocratic origin who became pioneers of Europe's future regeneration. In the minds of transnational elites, the continent's future horizons retained the contours of phantom empires. This title is available as Open Access. *Becoming International*  
Jens Bartelson, 2023-10-26. When and how did the modern world become an international one? Jens Bartelson, a leading scholar of the history of international thought, provides new answers to this question by analyzing how relations between polities have been conceptualized across different historical contexts from the sixteenth century to the present day. A global intellectual history of the international system, this book challenges the widespread assumption that this system emerged as a result of a transition from empires to states, instead proposing that the international realm is but a continuation of imperial relations by other means. Showing how the international system spread through the creative appropriation of European concepts of nation and state by non-Europeans, Bartelson argues that this system has taken on a life of its own to the point of becoming an empire in its own right.
