Emerging Market Portfolio Flows Mr.Serkan Arslanalp,Mr.Takahiro Tsuda,2015-12-17 Portfolio flows to emerging markets EMs tend to be correlated A possible explanation is the role global benchmarks play in allocating capital internationally the so called benchmark effect This paper finds that benchmark driven investors indeed play a large role in a key segment of the market the EM local currency government bond market accounting for more than one third of total foreign holdings as of end 2014

We find that the prominence of these investors declined somewhat after the May 2013 taper tantrum but remain high. This distinction is important in understanding the drivers of EM capital flows and their sensitivity to different types of shocks. In particular, a high share of benchmark driven investors may result in capital flows that are more sensitive to global shocks and less sensitive to country factors.

The Evolution of Power Geerat Vermeij, 2023-11-14. A sweeping new account of the role of power in the evolution of all life on Earth. Power has many dimensions from individual attributes such as strength and speed to the collective advantages of groups. The Evolution of Power takes readers on a breathtaking journey across history and the natural world revealing how the concept of power unifies a vast range of phenomena in the evolution of life and how natural selection has placed humanity and the planet itself on a trajectory of ever increasing power. Drawing on evidence from fossils, living organisms and contemporary society, Geerat Vermeij documents increases in power at all scales from body size, locomotor performance and the use of force in competition to efficiency in production and consumption within ecosystems. He shows how power, which he defines as the rate at which organisms acquire and apply energy, is tied to the emergence of cooperation and how the modern economy, which for the first time has established a monopoly over the biosphere by a single species, is a continuation of evolutionary trends stretching back to the dawn of life. Vermeij persuasively argues that we can find solutions to the many problems arising from this extreme concentration of power by broadening our exclusively human centered perspective. A masterful work by one of today's most innovative and forward thinking naturalists. The Evolution of Power offers a new understanding of our place in the grand sweep of evolutionary history.

Trauma Team Dynamics

Lawrence M. Gillman, Sandy Widder, Michael Blavias MD, Dimitrios Karakitsos, 2015-11-02. This is the first book exploring the unique dynamics created by a multidisciplinary trauma team and how crisis management strategies can improve teamwork and communication and potentially improve patient resuscitation outcomes. Crisis resource management (CRM) is integral to the way that we manage ourselves, team members and patients during emergency situations. It is essentially the ability to translate knowledge of what needs to be done into effective actions during a crisis situation. Building on the revolutionary American College of Surgeons Advanced Trauma Life Support (ATLS) course, Trauma Team Dynamics illustrates the integration of the principles of CRM to team dynamics throughout the resuscitation from the scene through pre-hospital care and transport to the trauma bay and finally to definitive care and beyond. The editors and contributors are international experts in trauma, critical care, emergency medicine, nursing, respiratory therapy and pre-hospital care and include NASA and United States military affiliated experts. Trauma Team Dynamics is intended for use as both a day-to-day clinical resource and a reference text and includes self-assessment questions as well as guidance on CRM curriculum design and implementation.

Film Properties of Plastics and Elastomers Laurence W. McKeen, Liesl K. Massey, 2013-10-22 This extensively revised and updated second edition of the only data handbook available on the engineering properties of commercial polymeric films details many physical mechanical optical electrical and permeation properties within the context of specific test parameters providing a ready reference for comparing materials in the same family as well as materials in different families Data are presented on the characteristics of 47 major plastic and elastomer packaging materials New to this edition the resin chapters each contain textual summary information including category general description processing methods applications and other facts as appropriate such as reliability weatherability and regulatory approval considerations for use in food and medical packaging Extensive references are provided The resin chapter material supplier trade name product data are presented in graphical and tabular format with results normalized to SI units retaining the familiar format of the 1st edition and allowing easy comparison between materials and test conditions

Fatigue and Tribological Properties of Plastics and Elastomers Laurence W. McKeen, 2016-03-31 Part of a series of data rich handbooks within the Plastics Design Library *Fatigue and Tribological Properties of Plastics and Elastomers* provides a comprehensive collection of graphical multipoint data and tabular data covering the fatigue and tribological performance of plastics The handbook is structured by grouping together plastics of similar polymer types into ten chapters Each of these chapters is split into two sections *Fatigue Properties* and *Tribological Properties* and together they provide a compendium of several hundred graphs and charts supplying the core data needed by engineers and scientists on a day to day basis The data for this third edition has been updated to cover upwards of five years since the previous edition was published and also includes an entirely new chapter covering sustainable and biodegradable

polymers The book also includes an extensive introductory section covering fatigue what it is and how it is measured the fundamentals of tribology polymer chemistry and plastics composition These chapters also provide readers with a full understanding of the data section and how to put it to use as a hard working information tool

Sub-Saharan Africa's Risk Perception Premium: In the Search of Missing Factors William Gbohoui,Rasmané Ouedraogo,Yirbehogre Modeste Some,2023-06-23 Policymakers from the sub Saharan Africa SSA region often flag a mispricing of their sovereign debt presumably originating from a perception risk by international investors that lead to unjustifiably high borrowing costs Against this background this paper explores the extent to which a potential SSA premium exists in the financial markets following a broader two fold approach Firstly using a sample of 1592 international primary sovereign fixed coupon bonds issued between 2003 2021 from Bond Radar by 89 countries we find that SSA countries pay significantly higher coupon at issuance compared to their peers from other regions Secondly we assess whether there is any bias against SSA countries in the secondary market that would result in higher refinancing cost Based on an unbalanced panel of quarterly data covering 107 countries over 1990 2022 we find that SSA countries pay higher refinancing costs in the secondary market The paper further explores whether there are other factors overlooked by the literature that matter for the risk pricing by international investors In that respect we explore the sensitivity of spreads to some structural dimensions where SSA countries face acute challenges the transparency of budget process the importance of the informal sector the level of financial development and the quality of public institutions The results show that the excess premium estimated for SSA countries vanishes when these structural factors are accounted for in the regressions
