INVESTIGATIONS: PILOT ERROR KILLS 50 PEOPLE in BUFFALO, the Crash of Colgan Air Flight 3407 Allistair Fitzgerald, 2010-04-16 On February 12 2009 about 2217 eastern standard time Colgan Air Flight 3407 a Bombardier DHC 8 400 on approach to Buffalo Niagara International Airport crashed into a residence in Clarence Center New York 5 nautical miles northeast of the airport The 2 pilots 2 flight attendants and 45 passengers aboard the airplane were killed one person on the ground was killed and the airplane was destroyed The National Transportation Safety Board determined that the probable cause of this accident was a pilot's error **Runway Overrun During Landing, Pinnacle Airlines Flight 4712**

Bombardier/Canadair Regional Jet CL600-2B19, N8905F, Traverse City, Michigan, April 12, 2007 United States. National Transportation Safety Board, 2008 On April 12 2007 about 0043 eastern daylight time a Bombardier Canadair Regional Jet CRJ CL600 2B19 N8905F operated as Pinnacle Airlines flight 4712 ran off the departure end of runway 28 after landing at Cherry Capital Airport TVC Traverse City Michigan There were no injuries among the 49 passengers including 3 lap held infants and 3 crewmembers and the aircraft was substantially damaged Weather was reported as snowing The airplane was being operated under the provisions of 14 Code of Federal Regulations Part 121 and had departed from Minneapolis St Paul International Wold Chamberlain Airport Minneapolis Minnesota about 2153 central daylight time

Instrument meteorological conditions prevailed at the time of the accident flight which operated on an instrument flight rules flight plan. The National Transportation Safety Board (NTSB) determines that the probable cause of this accident was the pilots' decision to land at TVC without performing a landing distance assessment which was required by company policy because of runway contamination initially reported by TVC ground operations personnel and continuing reports of deteriorating weather and runway conditions during the approach. This poor decision making likely reflected the effects of fatigue produced by a long demanding duty day and for the captain the duties associated with check airman functions. Contributing to the accident were 1 the Federal Aviation Administration pilot flight and duty time regulations that permitted the pilots long demanding duty day and 2 the TVC operations supervisor's use of ambiguous and unspecific radio phraseology in providing runway braking information. Pix Paper, 1988 **Air Transportation Operations Inspector's Handbook** United States. Federal Aviation Administration, 1988 *AIR CRASH INVESTIGATIONS FATIGUE? The Crash of Federal Express Flight 1478* Hank Williamson, Editor, 2012-10-01 On July 26 2002 about 0537 eastern daylight time Federal Express flight 1478 a Boeing 727-232F on its way from Memphis International Airport to Tallahassee Regional airport struck trees on short final approach and crashed short of runway 9 at the Tallahassee Regional Airport Florida. The flight was operating as a scheduled cargo flight from Memphis to Tallahassee. The captain, first officer, and flight engineer were seriously injured and the airplane was destroyed by impact and resulting fire. Night visual meteorological conditions prevailed for the flight which operated on an instrument flight rules flight plan. The National Transportation Safety Board determines that the probable cause of the accident was the crew's failure to establish and maintain a proper glidepath during the night visual approach to landing. Contributing to the accident was a combination of the captain's and first officer's fatigue, the crew's failure to monitor the approach, and the first officer's color vision deficiency. **Aircraft Engineering and Aerospace Technology**, 1994 **CFM56-5-A1 Engine Systems** CFM International Training, 1990 *Qualification of Life Extension Schemes for Engine Components* Workshop on Qualification of Life Extension Schemes for Engine Components, 1999 FAA Airworthiness Directive, 1983
