

5 Tips For Good Reporting

1

Start with what is *important*

Reporting is not writing a scientific paper. Instead, steal from journalism. Start with what is most important.

2

Use *simple* language

You want to be understood. Make it easy for the reader to understand what we try to communicate. Above all, be clear, brief and concrete, use short sentences and avoid technical jargon and abbreviations. They will love you for it.

3

Use *change* language

Instead of describing an *action*, put the emphasis on the *change*. Describe what is *different* now, now how you got there.

5

Visualize data

Don't rely only on words. Visuals are powerful, because they involve our capacity to quickly process visual clues

4

Back it up with *evidence*

Prevent burnouts by stopping what you are doing and do something else. Create a different atmosphere, add some novelties in your daily routine.

How To Make Good Report:

How to Design and Report Experiments Andy Field, Graham Hole, 2002-12-20 How to Design and Report Experiments is the perfect textbook and guide to the often bewildering world of experimental design and statistics It provides a complete map of the entire process beginning with how to get ideas about research how to refine your research question and the actual design of the experiment leading on to statistical procedure and assistance with writing up of results While many books look at the fundamentals of doing successful experiments and include good coverage of statistical techniques this book very importantly considers the process in chronological order with specific attention given to effective design in the context of likely methods needed and expected results Without full assessment of these aspects the experience and results may not end up being as positive as one might have hoped Ample coverage is then also provided of statistical data analysis a hazardous journey in itself and the reporting of findings with numerous examples and helpful tips of common downfalls throughout Combining light humour empathy with solid practical guidance to ensure a positive experience overall How to Design and Report Experiments will be essential reading for students in psychology and those in cognate disciplines with an experimental focus or content in research methods courses
