World Economic Outlook, April 2024 International Monetary Fund, International Monetary Fund. Research Dept., 2024-04-16 The latest World Economic Outlook reports economic activity was surprisingly resilient through the global disinflation of 2022-23 despite significant central bank interest rate hikes to restore price stability Risks to the global outlook are now broadly balanced compared with last year Monetary policy should ensure that inflation touches down smoothly while a renewed focus on fiscal consolidation is needed to rebuild room for budgetary maneuver and to ensure debt sustainability Structural reforms are crucial to revive medium term growth prospects amid constrained policy space

Emergency Management and Disaster Response Utilizing Public-Private Partnerships Hamner, Marvine Paula, Stovall, S. Shane, Taha, Doaa M., Brahim, Salah C., 2015-02-28 In a world of earthquakes tsunamis and terrorist attacks it is evident that emergency response plans are crucial to solve problems overcome challenges and restore and improve communities affected by such negative events Although the necessity for quick and efficient aid is understood researchers and professionals continue to strive for the best practices and methodologies to properly handle such significant events Emergency Management and Disaster Response Utilizing Public Private Partnerships bridges the gap between the theoretical and the practical components of crisis management and response By discussing and presenting research on the benefits and challenges of such partnerships this publication is an essential resource for

academicians practitioners and researchers interested in understanding the complexities of crisis management and relief through public and private partnerships Seychelles International Monetary Fund. African Dept.,2015-07-22 Context The robust recovery from the 2008 balance of payments and debt crisis has resulted in improved economic and social outcomes Continued policy discipline and reforms are needed for the microstate to mitigate its geographical and population constraints and maintain momentum in developing a diversified and resilient economy Focus With the fiscal stance anchored by the authorities debt reduction objective macroeconomic discussions concentrated on the smooth functioning of monetary and exchange rate policies On the structural agenda the dialogue focused on policies to promote sustained and inclusive growth particularly on the appropriate role for state owned enterprises SOEs Review The program is on track The authorities met the end December quantitative performance criteria except for narrowly exceeding the ceiling on reserve money The structural agenda remains broadly on track despite some delays Staff recommends completion of the second review under the Extended Arrangement and modification of the performance criteria for end June and end December 2015 and supports the authorities request for a waiver for the end December 2014 performance criterion for reserve money Outlook and risks With the external position having stabilized since the last review fundamentals are strengthening However the economy remains highly vulnerable to global developments including weakness in the key European markets while domestic risks center on the role of the SOEs Recommendations The authorities objective of reducing public debt below 50 percent of GDP by 2018 remains an appropriate and attainable anchor for fiscal policy The monetary policy framework should be further enhanced by increasing its forward orientation in the context of a flexible exchange rate Structural measures should focus on fostering inclusiveness and private sector led growth while improving economic governance and the focus of SOEs Data Data provision is broadly adequate for surveillance Priority areas include improved GDP statistics strengthening external sector statistics and extending coverage of the international investment position **Push Factors and Capital Flows to**

Emerging Markets Mr.Eugenio Cerutti,Mr.Stijn Claessens,Mr.Damien Puy,2015-06-22 This paper analyzes the behavior of gross capital inflows across 34 emerging markets EMs We first confirm that aggregate inflows to EMs co move considerably We then report three findings i the aggregate co movement conceals significant heterogeneity across asset types as only bank related and portfolio bond and equity inflows do co move ii while global push factors in advanced economies mostly explain the common dynamics their relative importance varies by type of flow and iii the sensitivity to common dynamics varies significantly across borrower countries with market structure characteristics especially the composition of the foreign investor base and the level of liquidity rather than borrower country s institutional fundamentals strongly affecting sensitivities Countries relying more on international funds and global banks are found to be more sensitive to push factors Our findings suggest that EMs need to closely monitor their lenders and investors to assess their inflow exposures to global push factors *Shocks and Capital Flows* Mr. Gaston Gelos,Ms. Ratna Sahay,2023-10-27 The high exposure of open

economies to shocks makes them particularly vulnerable to volatile capital flows and advanced economy monetary policy spillovers How should and do domestic policymakers respond The traditional answer has been to use flexible exchange rates as a shock absorber But flexible exchange rates may not offer full insulation when financial markets are imperfect This book brings together recent empirical studies at the International Monetary Fund IMF on the effectiveness of different tools in responding to such shocks The 18 chapters in this volume provide a rich background to the recently launched Integrated Policy Framework by the IMF They comprise assessments of countries actual use of different tools as well as in depth evaluations of their effectiveness and side effects covering macroprudential policies monetary policy foreign exchange intervention and capital flow management policies Many of the studies involve new data and methods to tackle the inherently difficult problems in identifying and comparing the effects of policies under different circumstances As a result the volume offers the reader a comprehensive in depth coverage of the policy oriented empirical research that has informed the development of a new way of thinking about open economy macroeconomics at the IMF

Challenges to Public Value Creation Brian J. Cook, 2024-03-27 This powerful collection shows that public value has come of age Its reach has extended far beyond the Anglosphere from which it has emerged And it provides a prism for strategic thinking about how governments are to deal with the grittiness of the contexts and challenge they currently face This must read volume sits at the cutting edge of these important developments Paul t Hart Professor of Public Administration Utrecht University The Netherlands

Challenges to Public Value Creation is a wonderful addition to the growing literature on public value creation John M Bryson McKnight Presidential Professor Emeritus University of Minnesota USA The purpose of government is to create public value While this has become an increasingly accepted refrain in public policy administration and management numerous questions remain about where when why how and by whom public value is created With everything from philosophical and conceptual arguments to empirical analyses and cases the contributors to this noteworthy volume offer new ideas reveal important insights suggest exciting directions for research and practice and ultimately give more substance and shape to the idea of public value creation Tina Nabatchi Director Program for the Advancement of Research on Conflict Collaboration Syracuse University USA This volume examines fundamental questions about the public value of public decisions More specifically it seeks to assess whether all public decisions create public value if it is possible to know what value for the public as a whole a government decision will create and how government officials can justify their decisions in terms of public value Leading experts bring a diverse array of perspectives on the normative epistemological and processual challenges to identifying describing measuring and evaluating the public value claims that public officials often articulate in defending their decisions and the results that citizens often seek The book will appeal to scholars and students of public policy and public administration Brian J Cook is Emeritus Professor of Public Administration and Policy at Virginia Tech USA

Delivering Entrepreneurship Education in Africa Chux Gervase Iwu, Richard Shambare, 2023-12-14 Delivering Entrepreneurship

Education in Africa brings together a collection of academic studies that offer an in depth analysis of the current state of entrepreneurship education in Africa The chapter authors engage discussions on how to make entrepreneurship education an attractive field of study for African students **Argentina** International Monetary Fund. Western Hemisphere

Dept.,2017-12-29 This paper discusses whether there is a more efficient way of taxing labor in Argentina that has a minimal cost in terms of foregone revenues Social security contributions for dependent workers are generally high in Argentina despite the plethora of different regimes and exceptions A reform of labor taxation in Argentina would need to address these inefficiencies Reducing the tax wedge would stimulate employment and formalization especially if targeted to low paid workers as there is evidence that it s their employment that mostly responds to tax incentives Argentina s tax and transfer system appears to be less progressive than the estimated optimal one The simulations suggest that the proposed changes would have a positive impact on economic activity and formality with a minor cost in terms of foregone revenues Greater labor supply and wages in the formal sector push up revenue from labor taxation compensating part of the direct cost of the reform **Power Systems: Modelling and Control Applications** A.
