Energy Pricing Models Recent Advances:

Handbook Of Energy Finance: Theories, Practices And Simulations Stephane Goutte, Duc Khuong Nguyen, 2020-01-30 Modeling the dynamics of energy markets has become a challenging task The intensification of their financialization since 2004 had made them more complex but also more integrated with other tradable asset classes More importantly their large and frequent fluctuations in terms of both prices and volatility particularly in the aftermath of the global financial crisis 2008 2009 posit difficulties for modeling and forecasting energy price behavior and are primary sources of concerns for macroeconomic stability and general economic performance This handbook aims to advance the debate on the theories and practices of quantitative energy finance while shedding light on innovative results and technical methods applied to energy markets Its primary focus is on the recent development and applications of mathematical and quantitative approaches for a better understanding of the stochastic processes that drive energy market movements The handbook is designed for not only graduate students and researchers but also practitioners and policymakers

Forecasting Models of Electricity Prices Javier Contreras, 2018-04-06 This book is a printed edition of the Special Issue Forecasting Models of Electricity Prices that was published in Energies Recent Advances of Neural Network Models and Applications Simone Bassis, Anna Esposito, Francesco Carlo Morabito, 2013-12-19 This volume collects a selection of contributions which has been presented at the 23rd Italian Workshop on Neural Networks the yearly meeting of the Italian Society for Neural Networks SIREN The conference was held in Vietri sul Mare Salerno Italy during May 23 24 2013 The annual meeting of SIREN is sponsored by International Neural Network Society INNS European Neural Network Society ENNS and IEEE Computational Intelligence Society CIS The book as well as the workshop is organized in two main components a special session and a group of regular sessions featuring different aspects and point of views of artificial neural networks artificial and natural intelligence as well as psychological and cognitive theories for modeling human behaviors and human machine interactions including Information Communication applications of compelling interest

Recent Advances in Energy Technologies N. Lakshmi Narasimhan, Mahmoud Bourouis, Vasudevan Raghavan, 2022-09-29 This book presents the select proceedings of the first International Conference on Energy and Materials Technologies ICEMT 2021 organized by the Department of Mechanical Engineering Sri Sivasubramaniya Nadar College of Engineering Kalavakkam India It covers the recent technologies in two broad thematic areas energy and materials Various topics covered in this book include hybrid energy advanced energy systems energy management energy policy geothermal nuclear energy bio energy waste to energy power plants and automotives The book will be useful for students researchers and professionals in the area of mechanical engineering especially various domains of energy **ICT for Smart Grid - Recent Advances, New Perspectives, and Applications** Abdelfatteh Haidine, 2024-07-03 Information and Communication Technology ICT plays a pivotal role in enabling and managing smart grids which are modernized electrical grids that leverage digital

technologies for enhanced efficiency reliability and sustainability ICT serves as the backbone of smart grids enabling efficient reliable and sustainable electricity delivery while supporting the integration of renewable energy sources and promoting active consumer participation in grid operations The current book treats different aspects of ICT in smart grids The use of renewable energy sources is the core element of a sustainable energy infrastructure Therefore different chapters focus on microgrids Furthermore the book presents use cases for the use of microgrids in special environments such as educational buildings rural areas and the housing industries The Internet of Things IoT represents the paradigm to model any intelligent or smart system In such IoT system functionalities are organized in overlaid layers therefore it is called a layered model with a hierarchical structure The bottom layer covers the nationwide dispatched energy infrastructure The upper layer can be represented through either the service layer applications or business layers The book describes and analyzes technologies and solutions for the data layer as well as the communications networking level

Recent Advances in Renewable Energy Technologies Mejdı Jeguirim,2021-10-21 Recent Advances in Renewable Energy Technologies is a comprehensive reference covering critical research laboratory and industry developments on renewable energy technological production conversion storage and management including solar energy systems thermal and photovoltaic wind energy hydropower geothermal energy bioenergy and hydrogen production and large scale development of renewable energy technologies and their impact on the global economy and power capacity Technological advancements include resources assessment and deployment materials performance improvement system optimization and sizing instrumentation and control modeling and simulation regulations and policies Each modular chapter examines recent advances in specific renewable energy systems providing theoretical and applied aspects of system optimization control and management and supports them with global case studies demonstrating practical applications and economical and environmental aspects through life cycle analysis The book is of interest to engineering graduates researchers professors and industry professionals involved in the renewable energy sector and advanced engineering courses dealing with renewable energy sources thermal and electrical energy production and sustainability Focuses on the progress and research trends in solar wind biomass and hydropower and geothermal energy production and conversion Includes advanced techniques for the distribution management optimization and storage of heat and energy using case studies

Intelligent Decision Support Systems—A Journey to Smarter Healthcare Smaranda Belciug,Florin Gorunescu,2019-03-20 The goal of this book is to provide in a friendly and refreshing manner both theoretical concepts and practical techniques for the important and exciting field of Artificial Intelligence that can be directly applied to real world healthcare problems Healthcare the final frontier Lately it seems like Pandora opened the box and evil was released into the world Fortunately there was one thing left in the box hope In recent decades hope has been increasingly represented by Intelligent Decision Support Systems Their continuing mission to explore strange new diseases to seek out new treatments and drugs and to intelligently manage healthcare resources and patients Hence this

book is designed for all those who wish to learn how to explore analyze and find new solutions for the most challenging domain of all time healthcare

Recent Advances in the Science and Technology of Zeolites and Related Materials, 2004-12-18 **Recent Advances in Aerospace Engineering** Sanjay Singh, Perumalla Janaki Ramulu, Sachin Singh Gautam, 2024-04-27 The book presents the select proceedings of 2nd International Conference on Modern Research in Aerospace Engineering MRAE 2023 It covers the latest research in the field of aerospace engineering and space technology Various topics covered in this book are aerospace propulsion space research avionics and instrumentation aerodynamics wind tunnel and computational fluid dynamics structural analysis and finite element method aerospace materials and manufacturing system air safety and airworthiness aircraft control system and stability aircraft maintenance overhauling NDT and other technical tests autonomous airborne systems airborne defence systems AI and ML applications in aerospace engineering unmanned aerial vehicles and flight mechanics The book will be useful for researchers and professionals in aerospace engineering and space science and technology

Recent Advances in Mechatronics Ryszard Jablonski, Mateusz Turkowski, Roman Szewczyk, 2007-09-19 Mechatronics is the synergistic combination of precision engineering electronics photonics and IT engineering The main research task for mechatronics is development and control of advanced hybrid systems covering all these fields and supported by interdisciplinary studies This book presents recent state of advances in mechatronics presented on the 7th International Conference Mechatronics 2007 hosted at the Faculty of Mechatronics Warsaw University of Technology Poland The chosen topics of the conference included Nanotechnology Automatic Control and Robotics Biomedical Engineering Design Manufacturing and Testing of MEMS Metrology Photonics Mechatronic Products The selected papers give an overview of the state of the art and present new research results and prospects of the future development in this interdisciplinary field of mechatronic systems This book will provide up to date and useful knowledge for researchers and engineers involved in mechatronics and related fields

Recent Advances in Power Electronics and Drives Jitendra Kumar, Premalata Jena, 2020-12-03 This book presents select proceedings of the Electric Power and Renewable Energy Conference 2020 EPREC 2020 It provides rigorous discussions case studies and recent developments in the emerging areas of power electronics especially power inverter and converter electrical drives regulated power supplies operation of FACTS HVDC etc The readers would be benefited in enhancing their knowledge and skills in these domain areas The book will be a valuable reference for beginners researchers and professionals interested in advancements in power electronics and drives

Recent Advances in DNS and LES Doyle Knight, Leonidas Sakell, 2012-12-06 Rapid advances in Direct Numerical Simulation DNS and Large Eddy Simulation LES of turbulence provide opportunities for improved prediction of incompressible and compressible turbulent flows The book includes five invited and thirty eight contributed papers presented at the Second AFOSR International Conference on DNS and LES held at Rutgers The State University of New Jersey on June

7 9 1999 A broad range of topics in DNS and LES are presented including new developments in LES modeling numerical algorithms for LES and DNS DNS and LES of reacting flows and DNS and LES for supersonic and hypersonic boundary layers The book provides a extensive view of the state of the art in DNS and LES **Energy Research Abstracts** ,1986

Mathematical Optimization for Efficient and Robust Energy Networks Natalia Selini Hadjidimitriou, Antonio Frangioni, Thorsten Koch, Andrea Lodi, 2021-03-19 This book presents a collection of energy production and distribution problems identified by the members of the COST Action TD1207 Mathematical Optimization in the Decision Support Systems for Efficient and Robust Energy Networks The aim of the COST Action was to coordinate the efforts of the experts in different fields from academia and industry in developing innovative tools for quantitative decision making and apply them to the efficient and robust design and management of energy networks The work covers three main goals to be a nimble while comprehensive resource of several real life business problems with a categorized set of pointers to many relevant prescriptive problems for energy systems to offer a balanced mix of scientific and industrial views to evolve over time in a flexible and dynamic way giving from time to time a more scientific or industrial or even political in a broad sense weighed perspective It is addressed to researchers and professionals working in the field *Energy Abstracts for Policy Analysis*

,1985-07 **Recent Advances in Mechanical Engineering** Sasmeeta Tripathy, Sikata Samantaray, J. Ramkumar, S. S. Mahapatra, 2023-05-30 This book presents select proceedings of the International Conference on Recent Advances in Mechanical Engineering Research and Development ICRAMERD 2022 focusing on the recent advances and best practices of mechanical engineering related technologies and sciences to meet the challenges in mechanical engineering digital technology and smart manufacturing The contents focus on design engineering advanced materials automation in engineering industrial and systems engineering energy and others Some of the topics discussed here include fracture and failure analysis fuels and alternative fuels non conventional machining combustion and IC engines advanced manufacturing technologies powder metallurgy and rapid prototyping industrial engineering and automation supply chain management design of mechanical systems vibrations and control engineering automobile engineering performance analysis of biomass energy systems heat transfer composite materials thermal modelling and simulations of different systems analysis of slurry pipeline systems waste management optimization and robotics The wide range of topics presented in this book will be useful for beginners researchers as well as professionals in mechanical engineering *Recent Advances in Geomicrobiology of the Ocean Crust* Beth N. Orcutt, Jason B. Sylvan, Cara M. Santelli, 2017-09-29 Igneous oceanic crust is one of the largest potential habitats for life on earth and microbial activity supported by rock water microbe reactions in this environment can impact global biogeochemical cycles However our understanding of the microbiology of this system especially the subsurface deep biosphere component of it has traditionally been limited by sample availability and quality Over the past decade several major international programs such as the Center for Dark Energy Biosphere Investigations the current International Ocean

Discovery Program and its predecessor Integrated Ocean Drilling Program and the Deep Carbon Observatory have focused on advancing our understanding of life in this cryptic yet globally relevant biosphere. Additionally, many field and laboratory research programs are examining hydrothermal vent systems, a seafloor expression of seawater that has been thermally and chemically altered in subsurface crust, and the microbial communities supported by these mineral-rich fluids. The *Frontiers in Microbiology* 3 September 2017 Recent Advances in Geomicrobiology of the Ocean Crust papers in this special issue bring together recent discoveries of microbial presence, diversity, and activity in these dynamic ocean environments. Cumulatively, the articles in this special issue serve as a tribute to the late Dr. Katrina J. Edwards, who was a pioneer and profound champion of studying microbes that rust the crust. This special issue volume serves as a foundation for the continued exploration of the subsurface ocean crust deep biosphere. Recent Advances on Soft Computing and Data Mining Rozaida Ghazali, Mustafa Mat Deris, Nazri Mohd Nawi, Jemal H. Abawajy, 2018-01-11 This book offers a systematic overview of the concepts and practical techniques that readers need to get the most out of their large-scale data mining projects and research studies. It guides them through the data analytical thinking essential to extract useful information and obtain commercial value from the data. Presenting the outcomes of International Conference on Soft Computing and Data Mining SCDM 2017 held in Johor Malaysia on February 6-8, 2018, it provides a well-balanced integration of soft computing and data mining techniques. The two constituents are brought together in various combinations of applications and practices. To thrive in these data-driven ecosystems, researchers, engineers, data analysts, practitioners, and managers must understand the design choices and options of soft computing and data mining techniques, and as such, this book is a valuable resource helping readers solve complex benchmark problems and better appreciate the concepts, tools, and techniques employed. *Recent Advances in Water and Wastewater Treatment with Emphasis in Membrane Treatment Operations* Anastasios I. Zouboulis, Ioannis Katsoyiannis, 2019-04-02 The present Special Issue brings together recent research findings from renowned scientists in the field of water treatment and assembled contributions on advanced technologies applied to the treatment of wastewater and drinking water with emphasis on novel membrane treatment technologies. 12 research contributions have highlighted various processes and technologies which can achieve effective treatment and purification of wastewater and of drinking water, aiming occasionally for water reuse. The main topics which are analyzed are the use of novel type membranes in bioreactors, the use of modified membranes, for example, using vacuum membrane distillation, the fouling of membranes, the problem of arsenic, antimony, and chromium contamination in groundwaters and its removal, and the use of novel technologies for more efficient ozonation.
