

These results suggest that the use of a single, non-validated questionnaire to assess the prevalence of mental health problems in the community may be inappropriate. The use of a validated questionnaire, such as the GHQ-12, may be more appropriate for the purpose of identifying mental health problems in the community. The use of a validated questionnaire may also be more appropriate for the purpose of identifying mental health problems in the community.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

risk but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability Some types of extreme weather and climate events have increased in frequency or magnitude but populations and assets at risk have also increased with consequences for disaster risk Opportunities for managing risks of weather and climate related disasters exist or can be developed at any scale local to international Prepared following strict IPCC procedures SREX is an invaluable assessment for anyone interested in climate extremes environmental disasters and adaptation to climate change including policymakers the private sector and academic researchers
