With numerous examples James Deneen and Carm Catanese argue that these failures are preventable. Early chapters document the two-tiered character of American public schools, the tragic consequences of failing schools for millions of students, mostly Black and Hispanic, and the financial costs to American society. In later chapters Deneen and Catanese describe the special problems of inner city schools and the changes in school organization and curriculum needed to overcome them. They also provide examples of schools in severely disadvantaged communities in which such changes have enabled students to succeed academically, graduate and enter college. In the final chapters the authors examine the public and non-public school options available to urban parents. They discuss school choice, a hotly debated issue in urban education. The book concludes with a plan consisting of six recommendations for reforming a failing urban school. The Public Service Monthly ,1919 *Resources in Education* ,1998-10
