**Motor Age**, 1910 Change the World Without Taking Power John Holloway, 2010-09-06 The wave of political demonstrations since the Battle of Seattle in 2001 have crystallised a new trend in left wing politics Modern protest movements are grounding their actions in both Marxism and Anarchism fighting for radical social change in terms that have nothing to do with the taking of state power This is in clear opposition to the traditional Marxist theory of revolution which centres on the overthrow of government In this book John Holloway asks how we can reformulate our understanding of revolution as the struggle against power not for power After a century of failed attempts by revolutionary and reformist movements to bring about radical social change the concept of revolution itself is in crisis John Holloway opens up the theoretical debate reposing some of the basic concepts of Marxism in a critical development of the subversive Marxist tradition represented by Adorno Bloch and Lukacs amongst others and grounded in a rethinking of Marx's concept of fetishisation how doing is transformed into being **Musical Courier**, 1919 *Particle Physics in the New Millennium* Josip Trampetic, Julius Wess, 2003-05-21 The traditional purpose of the Adriatic Meeting is to present most advanced scientific research conducted by the lecturers who take part in the development of their fields and in addition to provide a school like atmosphere for young scientists Dubrovnik as a geographical centre of this region of Europe provided a most adequate location for this conference Having very agreeable surroundings the conference site nevertheless gave a focus for very strong scientific interaction The subjects chosen for the 8th meeting in September 2001 were gauge theories particle phenomenology string theories and cosmology We were able to bring together a very good cross section of outstanding scientists who gave extraordinarily good presentations Certainly one reason for this success is that most of us feel obliged to help the scientific life in South East Europe return to its former level However there are very exciting new scientific developments as well Part of the meeting was dominated by neutrino physics which has just seen exciting progress by establishing neutrino masses experimentally This was discussed within neutrino masses and grand unified theories GUTs General aspects of neutrino physics and CP violation neutrino mixing and the baryon asymmetry were presented along the same lines On the theoretical side the idea of the construction of gauge theories on non commutative spaces and their

phenomenological implications is accepted worldwide within the particle physics community      **New York Magazine**
