

Preparation of Letters for the IEEE Sensors Journal (February 2006)

First A. Author, Second B. Author, Jr., *Fellow IEEE*, and Third C. Author, *Member IEEE*

Abstract—These instructions, modeled after the standard format for all IEEE journal papers, give you guidelines for preparing Letters for IEEE SENSORS JOURNAL. Use this document as a template to prepare your manuscript if you are using Microsoft Word 6.0. Otherwise, use this document as an instruction set. Define all symbols used in the abstract. Do not cite references in the abstract. Do not delete the blank line immediately above the abstract; it sets the footnote at the bottom of this column.

Index Terms—About four key words or phrases in alphabetical order, separated by commas. For a list of suggested keywords, send a blank e-mail to keywords@ieee.org or visit the IEEE web site http://www.ieee.org/organizations/pubs/ami_prosd/keywrd98.txt at

I. INTRODUCTION

THIS document is a template for Microsoft Word versions 6.0 or later. If you would prefer to use LATEX, download IEEE's LATEX style and sample files from <http://www.ieee.org/organizations/pubs/transactions/stylesheets.htm>.

When you open this model DOC file, select "Page Layout" from the "View" menu in the menu bar (View | Page Layout), which allows you to see the layout of the document. Then type over the header and section of the document, or cut and paste from another document. The pull-down style menu is at the left of the Formatting Toolbar at the top of your Word window (for example, the style at this point in the document is "Text"). Highlight a section that you want to designate with a certain style, then select the appropriate name on the style menu. The

Manuscript received October 9, 2001. (Write the date on which you submitted your paper for review.) This work was supported in part by the U.S. Department of Commerce under Grant H5123456 (sponsor and financial support acknowledgment goes here). Paper titles should be written in uppercase and lowercase letters, not all uppercase. Avoid writing long formulas with subscripts in the title; short formulas that identify the elements are fine (e.g., "Ni-Fe-B"). Do not write "Olevited" in the title. Full names of authors are preferred in the author field, but are not required. Put a space between authors' initials.

F. A. Author is with the National Institute of Standards and Technology, Boulder, CO 80505 USA (corresponding author to provide phone: 303-555-5555; fax: 303-555-5555; e-mail: author@boulder.nist.gov).

S. B. Author, Jr., was with Rice University, Houston, TX 77005 USA. He is now with the Department of Physics, Colorado State University, Fort Collins, CO 80523 USA (e-mail: author@lamar.colostate.edu).

T. C. Author is with the Electrical Engineering Department, University of Colorado, Boulder, CO 80309 USA, on leave from the National Research Institute for Metals, Tsukuba, Japan (e-mail: author@nrim.go.jp).

style will adjust your fonts and line spacing. **Do not change the font sizes or line spacing to squeeze more text into a limited number of pages.** Use italics for emphasis; do not underline.

To insert images in Word, position the cursor at the insertion point and either use Insert | Picture | From File or copy the image to the Windows clipboard and then Edit | Paste Special | Picture (with "Float over text" unchecked).

II. PROCEDURE FOR MANUSCRIPT SUBMISSION

A. Manuscript Preparation

Use the guidelines described below to prepare your Letters manuscript using the two-column format as illustrated in this DOC file. **Letters are limited to two pages and are accepted or rejected as submitted, so prepare your manuscripts carefully.** No exceptions to the two-page limit will be made.

B. Manuscript Submission

All manuscripts are submitted using Manuscript Central. The website is <http://sensors-ieee.manuscriptcentral.com/>.

C. Tables and Figures

In your submitted Letters manuscripts, make the tables and figures appear in the format as shown in Fig. 1 and Table 1

Fig. 1. Magnetization as a function of applied field. Note that "Fig." is abbreviated. There is a period after the figure number, followed by two spaces. It is good practice to explain the significance of the figure in the caption.

Using the Engineering Literature Bonnie A. Osif, 2016-04-19 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links

Digital Optical Communications Le Nguyen Binh, 2008-11-20 The need for advanced transmission techniques over long haul optically amplified communications has prompted a convergence of digital and optical communications Digital Optical Communications explores the practical applications of this union and applies digital modulation techniques to optical communications systems After reviewing the fundamental **Guide to Information Sources in Engineering** Charles Lord, 2000-08-15 The only source that focuses exclusively on engineering and technology this important guide maps the dynamic and changing field of information sources published for engineers in recent years Lord highlights basic perspectives access tools and English language resources directories encyclopedias yearbooks dictionaries databases indexes libraries buyer s guides Internet resources and more Substantial emphasis is placed on digital resources The author also discusses how engineers and scientists use information the culture and generation of scientific information different types of engineering information and the tools and resources you need to locate and access that material Other sections describe regulations standards and specifications government resources professional and trade associations and education and career resources Engineers scientists librarians and other information professionals working with engineering and technology information will welcome this research

Optical Fiber Communication Systems with MATLAB® and Simulink® Models, Second Edition Le Nguyen Binh, 2014-12-01 Carefully structured to instill practical knowledge of fundamental issues Optical Fiber Communication Systems with MATLAB and Simulink Models describes the modeling of optically amplified fiber communications systems using MATLAB and Simulink This lecture based book focuses on concepts and interpretation mathematical procedures and engineering applications shedding light on device behavior and dynamics through computer modeling Supplying a deeper understanding of the current and future state of optical systems and networks this Second Edition Reflects the latest developments in optical fiber communications technology Includes new and updated case studies examples end of chapter problems and MATLAB and Simulink models Emphasizes DSP based coherent reception techniques essential to advancement in short and long term optical transmission networks Optical Fiber Communication Systems with MATLAB and Simulink Models Second Edition is intended for use in university and professional training courses in the specialized field of optical communications This text should also appeal to students of engineering and science who have already taken courses in electromagnetic theory signal processing and digital communications as well as to optical engineers designers and practitioners in industry

Optical Fiber Communications Systems Le Nguyen Binh, 2011-06-08 Carefully structured to provide practical knowledge

on fundamental issues Optical Fiber Communications Systems Theory and Practice with MATLAB and Simulink Models explores advanced modulation and transmission techniques of lightwave communication systems With coverage ranging from fundamental to modern aspects the text presents optical communic *Space Photonic Communications* Le Nguyen Binh,2025-01-29 This book explores the extension of fiber optic communications technology to space optical communications It presents the specific demands for space communications and examines propagation in a vacuum and also over the turbulence of air free space Space Photonic Communications begins with historical aspects of optical communications in both terrestrial and inter satellite constellations It presents the advances in optical communications and integrated photonics that have enabled the technological developments for space photonic communications especially coherent optical communications to transport Tbps information The author discusses how the transmission of massive amounts of data over very long distances requires Tera bps communications in real time for both military and civil applications The author also explores laser communications with the physics of laser propagation over ultra long distances without optical amplifications at intermediate locations He also examines modulation and receiving techniques for space photonic communications Intended for communications engineers and professionals especially those in laser communication technologies this book could also be used in courses on advanced optical communications photonic communications and communication techniques and technologies **Understanding Jitter and Phase Noise** Nicola Da Dalt,Ali Sheikholeslami,2018-02-22 Gain an intuitive understanding of jitter and phase noise with this authoritative guide Leading researchers provide expert insights on a wide range of topics from general theory and the effects of jitter on circuits and systems to key statistical properties and numerical techniques Using the tools provided in this book you will learn how and when jitter and phase noise occur their relationship with one another how they can degrade circuit performance and how to mitigate their effects all in the context of the most recent research in the field Examine the impact of jitter in key application areas including digital circuits and systems data converters wirelines and wireless systems and learn how to simulate it using the accompanying Matlab code Supported by additional examples and exercises online this is a one stop guide for graduate students and practicing engineers interested in improving the performance of modern electronic circuits and systems **Computer Systems: Architectures, Modeling, and Simulation** Andy Pimentel,Stamatis Vassiliadis,2004-07-05 This book constitutes the refereed proceedings of the 4th International Workshop on Systems Architectures Modeling and Simulation SAMOS 2004 held in Samos Greece on July 2004 Besides the SAMOS 2004 proceedings the book also presents 19 revised papers from the predecessor workshop SAMOS 2003 The 55 revised full papers presented were carefully reviewed and selected for inclusion in the book The papers are organized in topical sections on reconfigurable computing architectures and implementation and systems modeling and simulation Optical Modulation Le Nguyen Binh,2017-11-22 This books aims to present fundamental aspects of optical communication techniques and advanced modulation techniques and extensive applications of

optical communications systems and networks employing single mode optical fibers as the transmission system New digital techniques such as chromatic dispersion polarization mode dispersion nonlinear phase distortion effects etc will be discussed Practical models for practice and understanding the behavior and dynamics of the devices and systems will be included

Telecommunication Networks Eugenio Iannone, 2017-12-19 Many argue that telecommunications network infrastructure is the most impressive and important technology ever developed Analyzing the telecom market's constantly evolving trends research directions infrastructure and vital needs Telecommunication Networks responds with revolutionized engineering strategies to optimize network construction Omnipresent in society telecom networks integrate a wide range of technologies These include quantum field theory for the study of optical amplifiers software architectures for network control abstract algebra required to design error correction codes and network thermal and mechanical modeling for equipment platform design Illustrating how and why network developers make technical decisions this book takes a practical engineering approach to systematically assess the network as a whole from transmission to switching Emphasizing a uniform bibliography and description of standards it explores existing technical developments and the potential for projected alternative architectural paths based on current market indicators The author characterizes new device and equipment advances not just as quality improvements but as specific responses to particular technical market necessities Analyzing design problems to identify potential links and commonalities between different parts of the system the book addresses interdependence of these elements and their individual influence on network evolution It also considers power consumption and real estate which sometimes outweigh engineering performance data in determining a product's success To clarify the potential and limitations of each presented technology and system analysis the book includes quantitative data inspired by real products and prototypes Whenever possible it applies mathematical modeling to present measured data enabling the reader to apply demonstrated concepts in real world situations Covering everything from high level architectural elements to more basic component physics its focus is to solve a problem from different perspectives and bridge descriptions of well consolidated solutions with newer research trends

Enjoying the Tune of Appearance: An Mental Symphony within **Ieee Journal Format**

In a global used by screens and the ceaseless chatter of quick interaction, the melodic splendor and emotional symphony created by the published word usually fade into the background, eclipsed by the relentless noise and disruptions that permeate our lives. Nevertheless, set within the pages of **Ieee Journal Format** a stunning fictional value brimming with raw thoughts, lies an immersive symphony waiting to be embraced. Constructed by an elegant composer of language, that interesting masterpiece conducts readers on a mental journey, skillfully unraveling the concealed melodies and profound affect resonating within each carefully crafted phrase. Within the depths with this moving examination, we shall discover the book is central harmonies, analyze their enthralling publishing design, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
