Percutaneous Treatment of Cardiovascular Diseases in Women Patrizia Presbitero, Julinda Mehilli, Anna Sonia Petronio, 2016-09-20 This book describes a wide range of interventional procedures currently employed in the treatment of cardiac diseases in women with the aim of enabling not only interventional cardiologists but also cardiologists and cardiac surgeons to refine their approach to female patients and thus improve outcomes The book reflects the increasing awareness of gender differences with regard to coronary artery disease and structural valve heart disease Examples include myocardial infarction which carries a worse prognosis in women in part because they suffer from this disease mostly in the 7th decade of life present more frequently with hemodynamic instability and later from symptom onset and have fragile small and tortuous coronary arteries that are more technically demanding in the context of primary percutaneous coronary intervention Another example is symptomatic aortic stenosis which carries a better prognosis in women who undergo trans catheter aortic valve implantation partially due to a better annulus prosthesis match which leads to less residual paravalvular regurgitation better left ventricular function and lower aggregation of comorbidities Further in women left ventricular response to aortic stenosis is typified by muscle hypertrophy with a small ventricular cavity These differences are reflected in the clinical manifestations and their impact on diagnosis treatment and choice of tools and devices for use in interventional procedures By explaining the at times subtle variances in disease and treatment techniques for female and male patients this book will help practitioners select the most appropriate procedures and materials in a range of settings Financial Literacy Education Jay Liebowitz, 2018-10-09 Today's graduates should be grounded in the basics of personal finance and possess the skills and knowledge necessary to make informed decisions and take responsibility for their own financial well being Faced with an array of complex financial services and sophisticated products many graduates lack the knowledge and skills to make rational informed decisions on the use of their money and planning for future events such as retirement This book shows what you can do to improve financial literacy awareness and education It covers the use of interactive games and tutorials peer to peer mentoring and financial literacy contests in addition to more formal education It gives you a sample of approaches and experiences in the financial literacy arena Divided into three parts the book covers financial literacy education for grades K 12 college and post college Current Challenges in Cardiovascular Molecular Diagnostics Matteo Vatta, Valeria

Novelli,Luisa Mestroni,Jeffrey A. Towbin,Carlo Napolitano,Guia Guffanti,2017-09-12 The field of cardiovascular genetics has tremendously benefited from the recent application of massive parallel sequencing technology also referred to as next generation sequencing NGS However along with the discovery of additional genes associated with human cardiac diseases the analysis of large dataset of genetic information uncovered a much more complex and variegated landscape which often departs from the comfort zone of the monogenic Mendelian diseases image that clinical molecular geneticists have been well acquainted with for many decades It is now clear that in addition to highly penetrant genetic variants which in isolation are able to recapitulate the full clinical presentation when expressed in animal models we are now aware that a small but significant fraction of subjects presenting with cardiac muscle diseases such as cardiomyopathies or primary arrhythmias such as long QT syndrome LQTS may harbor at least two deleterious variants in the same gene compound heterozygous or in different gene double heterozygous Although the clinical presentation in subjects with more than one deleterious variant appears to be more severe and with an earlier disease onset it somehow changes the viewpoint of clinical molecular geneticists whose aim is to identify all possible genetic contributors to a human condition In this light the employment in clinical diagnostics of the NGS technology allowing the simultaneous interrogation of a DNA target spanning from large panel of genes up to the entire genome will definitely aid at uncovering all such contributors which will have to be tested functionally to confirm their role in human cardiac conditions The uncovering of all clinically relevant deleterious changes associated with a cardiovascular disease would probably increase our understanding of the clinical variability commonly occurring among affected family relatives and potentially provide with unexpected therapeutic targets for the treatment of symptoms related to the presence of accessory deleterious genetic variants other than the key molecular culprit The objective of this Research Topic is to explore the current challenges presenting to the cardiovascular genetics providers such as clinical geneticists genetic counselors clinical molecular geneticists and molecular pathologists involved in the diagnosis counseling testing and interpretation of genetic tests results for the comprehensive management of patients affected by cardiovascular genetic disorders Globalisation and Education Policy Reform in Botswana Richard Tabulawa,2023-07-21

This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana s Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As

the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies International Conference on Multi disciplinary Technologies and challenges in Industry 4.0 Dr. Prakash s, dr. Advanced Statistics in Criminology and Criminal Justice David Weisburd, David B. Wilson, Alese Wooditch, Chester Britt, 2021-10-21 This book provides the student researcher or practitioner with the tools to understand many of the most commonly used advanced statistical analysis tools in criminology and criminal justice and also to apply them to research problems The volume is structured around two main topics giving the user flexibility to find what they need quickly The first is the general linear

model which is the main analytic approach used to understand what influences outcomes in crime and justice. It presents a series of approaches from OLS multivariate regression through logistic regression and multinomial regression, hierarchical regression to count regression. The volume also examines alternative methods for estimating unbiased outcomes that are becoming more common in criminology and criminal justice, including analyses of randomized experiments and propensity score matching. It also examines the problem of statistical power and how it can be used to better design studies. Finally, it discusses meta-analysis, which is used to summarize studies, and geographic statistical analysis, which allows us to take into account the ways in which geographies may influence our statistical conclusions.
