**Potential for Data Loss from Security Protected Smartphones** Vikas Rajole, 2014-06-27 Smartphones have been widely accepted by mass market users and enterprise users. However, the threats related to smartphones have emerged. Smartphones carry substantial amounts of sensitive data. There have been successful attacks in the wild on jailbroken phones. Therefore, smartphones need to be treated like a computer and have to be secured from all types of attacks. There is proof of concept attacks on Apple iOS and Google Android. This project aims to analyze some of the attacks on smartphones and find possible solutions in order to defend the attacks. Thereby, this project is based on a proof of concept malware for testing antivirus software.

International Legal Theory and the Cognitive Turn Anne van Aaken, Moshe Hirsch, 2025-04-02 Cognitive and behavioural studies are making inroads into international law, international policy and literature. Firstly, international practice is drawing increasingly on behavioural studies. The United Nations, UN and its agencies have turned to behavioural science to confront new challenges faced by the international community, including the Sustainable Development Goals, climate change and gender equality. Similarly, the World Bank and World Health Organization have created teams of experts to advise on the incorporation of behavioural insights to support their operations. Other international organizations are likewise following suit. Secondly, the cognitive behavioural turn is generating innovative research work in disciplines neighbouring international law and is gaining similar traction in international legal scholarship. Yet, despite this, the implications of cognitive behavioural studies for international legal theory remain underexplored. With few exceptions, international legal theories have long failed to explicitly address the cognitive behavioural assumptions of their respective theoretical approaches. To fill this gap, this book systematically examines the impact of the cognitive behavioural turn on the main theoretical schools within international legal scholarship. Across thirteen chapters, the contributors uncover the cognitive bases of their respective theories, exploring both the cognitive similarities underlying the assumptions of different theories of international law as well as the limitations of the use of behavioural science in international law theories. International Legal Theory and the Cognitive Turn makes explicit the relationship between cognitive behavioural methodologies and other ways of thinking about international law, including TWAIL, feminist and legal realist approaches and more. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read on Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations.

**It Security Products for Corporate Users** Peter Stelzhammer, Andreas Clementi, Thomas Arlt, Philippe Rödlach, 2010

Most organizations are aware of the risks threatening their IT environment. Viruses, trojans, worms, exploits and many other threats represent a serious danger for the IT department. A collapse of the IT system could mean grave financial losses right up to insolvency for a company. The IT departments of companies are conscious of this problem. Getting the best protection against these threats is the only issue. A simple file antivirus solution alone is totally inadequate as there are too many threats from contaminated e-mails, exploits, etc. What is required is a comprehensive suite that provides protection against all of these.

**Functional Diversity**

Because of the immense functional diversity of various antivirus suites and corporate products it is becoming increasingly difficult for decision makers in the IT sector to get a proper overview. Which product should one opt for and for which areas of protection? During these tests our main focus has not been on malware detection rates but on the products' handling and user friendliness and the scope of functionality. We have compiled the functional scope of various products in a detailed table. For malware detection rates of individual products please refer to the tests of our website <http://www.av-comparatives.org>
