From Manual Workers to Wage Laborers Robert Castel, 2017-07-05 In this monumental book sociologist Robert Castel reconstructs the history of what he calls the social question or the ways in which both labor and social welfare have been organized from the Middle Ages onward to contemporary industrial society Throughout the author identifies two constants bearing directly on the question of who is entitled to relief and who can be excluded the degree of embeddedness in any given community and the ability to work Along this dual axis the author locates virtually the entire history of social welfare in early modern and contemporary Europe This work is a systematic defense of the meaningfulness of the category of the social written in the tradition of Foucault Durkheim and Marx Castel imaginatively builds on Durkheim's insight into the essentially social basis of work and welfare Castel populates his sociological framework with vivid characterizations of the transient lives of the disaffiliated those colorful itinerants whose very existence proved such a threat to the social fabric of early modern Europe Not surprisingly he discovers that the cruel and punitive measures often directed against these marginal figures are deeply implicated in the techniques and institutions of power and social control The author also treats the flipside of the problem of social assistance namely matters of work and wage labor Castel brilliantly reveals how the seemingly objective line of demarcation between able bodied beggars those who are capable of work but who chose not to do so and those who are truly disabled becomes stretched in modernity to make room for the category of the working poor It is the novel crisis posed by those masses of population who are unable to maintain themselves by their labor alone that most deeply challenges modern societies and forges recognizably modern policies of social assistance The author's gloss on the social question also offers us valuable perspectives on contemporary

Cherlin,2014-12-04 Two generations ago young men and women with only a high school degree would have entered the plentiful industrial occupations which then sustained the middle class ideal of a male breadwinner family Such jobs have all but vanished over the past forty years and in their absence ever growing numbers of young adults now hold precarious low paid jobs with few fringe benefits Facing such insecure economic prospects less educated young adults are increasingly forgoing marriage and are having children within unstable cohabiting relationships This has created a large marriage gap between them and their more affluent college educated peers In *Labor's Love Lost* noted sociologist Andrew Cherlin offers a new historical assessment of the rise and fall of working class families in America demonstrating how momentous social and economic transformations have contributed to the collapse of this once stable social class and what this seismic cultural shift means for the nation's future Drawing from more than a hundred years of census data Cherlin documents how today's marriage gap mirrors that of the Gilded Age of the late nineteenth century a time of high inequality much like our own Cherlin demonstrates that the widespread prosperity of working class families in the mid twentieth century when both income inequality and the marriage gap were low is the true outlier in the history of the American family In fact changes in the economy culture and family formation in recent decades have been so great that Cherlin suggests that the working class family pattern has largely disappeared *Labor's Love Lost* shows that the primary problem of the fall of the working class family from its mid twentieth century peak is not that the male breadwinner family has declined but that nothing stable has replaced it The breakdown of a stable family structure has serious consequences for low income families particularly for children many of whom underperform in school thereby reducing their future employment prospects and perpetuating an intergenerational cycle of economic disadvantage To address this disparity Cherlin recommends policies to foster educational opportunities for children and adolescents from disadvantaged families He also stresses the need for labor market interventions such as subsidizing low wages through tax credits and raising the minimum wage *Labor's Love Lost* provides a compelling analysis of the historical dynamics and ramifications of the growing number of young adults disconnected from steady decent paying jobs and from marriage Cherlin's investigation of today's would be working class shines a much needed
