author with wide experience of the education sector both in the UK and abroad identifies the current system's strengths and weaknesses. He concludes that England has some of the best teachers in the world but one of the most muddled systems. Challenging the government's view that there is no alternative, he proposes radical changes to help all schools become good schools. They include a system of schools receiving a fair balance of pupils who learn easily and those who do not, ensuring a more even spread of effective teachers as well as banning league tables, outlawing selection, opening up faith schools and integrating private schools into the state system. In the final chapter, he asks readers who share his concerns to demand that the politicians alter course. The book will appeal to parents, education students and teachers as well as everyone interested in the future education of our children.
