Innovations in Science Teacher Education in the Asia Pacific Chen-Yung Lin, Ru-Jer Wang, 2014-01-27 *Innovations in Science Teacher Education in the Asia Pacific* Handbook of Research on Digital Tools for Writing Instruction in K-12 Settings Anderson, Rebecca S., Mims, Clif, 2014-04-30 More emphasis is being placed on writing instruction in K 12 schools than ever before With the growing number of digital tools in the classroom it is important that K 12 teachers learn how to use these tools to effectively teach writing in all content areas The Handbook of Research on Digital Tools for Writing Instruction in K 12 Settings will provide research about how students use digital tools to write both in and out of school settings as well as discuss issues and concerns related to the use of these learning methods This publication is beneficial to educators professionals and researchers working in the field of K 12 and teacher education **An Age of Accountability** John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree **The Disorder of Mathematics Education** Hauke Straehler-Pohl, Nina Bohlmann, Alexandre Pais, 2016-08-23 Research within a socio political paradigm or turn has been gradually recognized and institutionalized as an important part of mathematics education This book focuses on the neglected problems tensions and contradictions evoked by this process The authors do this by challenging current regimes of truth about mathematics education by identifying how recent technological developments challenge or suspend contemporary conceptions of mathematics education by critiquing the ideological entanglement of mathematics its education and schooling with capitalism by self reflective analyses of researchers impacts on shaping what is and can be perceived as the practice of mathematics education research and by confronting main stream mathematics education with socio political contexts that are usually neglected In this way mathematical rationality becomes contextualized within contemporary society where it reproduces itself through technologies social practices media and other
