The Ponzi Scheme Puzzle Tamar Frankel, 2012-08-13 Charles Ponzi perpetrated his infamous scheme almost a hundred years ago But his method of using new investments to pay existing investors and finance a highflying lifestyle is alive and well just as much money is lost in the United States today from Ponzi schemes as from shoplifting Somehow con artists are able to dazzle wealthy educated individuals and sophisticated institutions and convince them to hand over huge sums of money How In The Ponzi Scheme Puzzle renowned legal scholar Tamar Frankel explores these con artists fascinating power of persuasion and deception uncovering the subtle signals that mimic truth and honesty After years of close study of hundreds of cases Frankel explains the striking patterns that emerge and the common characteristics of the con artists and their victims She offers clear yet comprehensive descriptions of the various designs of Ponzi schemers attractive offers and flags the ways in which they mask their deception through specialized methods of advertising and selling She then constructs lucid profiles of the con artists and their victims exposing the core nature of the people at the heart of the schemes and showing how over time the lines between predator and prey are blurred There are indeed many lessons to learn from these stories and Frankel brings them to light through the insightful results of her research She shows how peoples attitudes are ambivalent and uncertain toward con artists perhaps because their behavior is so seemingly honest because they act like the social leaders with whom they are likely to mingle or perhaps because their actions are thought to shake up a complacent society Frankel concludes by offering a surprising solution on how to prevent charming dangerous con artists from perpetuating the enduring disastrous legacy of Charles Ponzi

Getting It Wrong W. Joseph

Campbell, 2016-10-25 Many of American journalism's best known and most cherished stories are exaggerated, dubious or apocryphal. They are media-driven myths and they attribute to the news media and their practitioners far more power and influence than they truly exert. In *Getting It Wrong*, writer and scholar W. Joseph Campbell confronts and dismantles prominent media-driven myths describing how they can feed stereotypes, distort understanding about the news media and deflect blame from policymakers. Campbell debunks the notions that the Washington Post's Watergate reporting brought down Richard M. Nixon's corrupt presidency; that Walter Cronkite's characterization of the Vietnam War in 1968 shifted public opinion against the conflict; and that William Randolph Hearst vowed to furnish the war against Spain in 1898. This expanded second edition includes a new preface and new chapters about the first Kennedy-Nixon debate in 1960, the haunting Napalm Girl photograph of the Vietnam War and bogus quotations driven by the Internet and social media. *The Graduate Student's Guide to Numerical Analysis '98* Mark Ainsworth, Jeremy Levesley, Marco Marletta, 2012-12-06 The Eighth EPSRC Numerical Analysis Summer School was held at the University of Leicester from the 5th to the 17th of July 1998. This was the third Numerical Analysis Summer School to be held in Leicester. The previous meetings in 1992 and 1994 had been carefully structured to ensure that each week had a coherent theme. For the 1998 meeting, in order to widen the audience, we decided to relax this constraint. Speakers were chosen to cover what may appear at first sight to be quite diverse areas of numerical analysis. However, we were pleased with the extent to which the ideas cohered and particularly enjoyed the discussions which arose from differing interpretations of those ideas. We would like to thank all six of our main speakers for the care which they took in the preparation and delivery of their lectures. In this volume, we present their lecture notes in alphabetical rather than chronological order. Nick Higham, Alastair Spence and Nick Trefethen were the speakers in week 1, while Bernardo Cockburn, Stig Larsson and Bob Skeel were the speakers in week 2. Another new feature of this meeting compared to its predecessors was that we had invited seminars. A number of established academics based in the UK were asked to participate in the afternoon seminar program. **Playing for Power** Marvin T. Chiles, 2025-06-15 Reveals the role of amateur Black football and basketball in Virginia before integration as a form of resistance to white supremacy. In *Playing for Power*, Marvin T. Chiles offers a fascinating account of amateur sports in Jim Crow Virginia, revealing how, in addition to churches, workspaces and civil rights organizations, sports were also a key arena for Black resistance to white supremacy. Drawing from a rich trove of primary sources, Chiles recounts the development of Black football and basketball culture at the high school and college levels in Virginia from the 1890s to the early 1970s. Looking beyond their role as leisure pastimes, Chiles demonstrates how amateur sports strengthened education, neutralized class divisions, shaped Black masculinity, mentored Black male leadership, cultivated race pride and reflected Black desires for urban modernity. Illuminating the ways Black athletes created a world that pushed for racial progress through objective, meritocratic achievement anchored by masculine leadership and institutional success, *Playing for Power* traces how amateur sports coalesced into a key cultural

institution that fostered Black Virginians collective sense of community achievement and purpose during segregation cornerstones of later advances in the Civil Rights Movement Playing for Power also contributes to a larger understanding of sports history and how amateur sports became favorite American spectacles and markers of Southern identity Chiles s groundbreaking work will interest historians scholars and individuals interested in the intersection of sports and civil rights and the history of Black sports during the Jim Crow era

Steamship Nationalism Mark A. Russell,2020-04-15 Steamship Nationalism is a cultural social and political history of the S S Imperator Vaterland and Bismarck Transatlantic passenger steamships launched by the Hamburg Amerikanische Packetfahrt Aktien Gesellschaft HAPAG between 1912 and 1914 they do not enjoy the international fame of their British counterparts most notably the Titanic Yet the Imperator class liners were the largest most luxurious passenger vessels built before the First World War In keeping with the often overlooked history of its merchant marine as a whole they reveal much about Imperial Germany in its national and international dimensions As products of business decisions shaped by global dynamics and the imperatives of international travel immigration and trade HAPAG s giant liners bear witness to Germany s involvement in the processes of globalization prior to 1914 Yet this book focuses not on their physical but on their cultural construction in a variety of contemporaneous media including the press and advertising on both sides of the Atlantic At home they were presented to the public as symbolic of the nation s achievements and ambitions in ways that emphasize the complex nature of German national identity at the time Abroad they were often construed as floating national monuments and as such facilitated important encounters with Germany both virtual and real for the populations of Britain and America Their overseas reception highlights the multi faceted image of the European superpower that was constructed in the Anglo American world in these years More generally it is a pointed indicator of the complex relationship between Britain the United States and Imperial Germany

Karina Gentgen,2012-06-01 Bachelor Thesis from the year 2010 in the subject English Language and Literature Studies Linguistics grade 1 0 Justus Liebig University Giessen Language Literature and Culture language English abstract English is everywhere Not only is it the language of science the internet and advertisement for instance but it is the lingua franca that allows communication all over the world Thanks to globalization the increasing importance of the media the changing lifestyles of the younger generations as well as the coalescing Europe we cannot evade its impact Not unnaturally the English language has always been and still is a vital part of the German educational system with a tendency to expand its influence throughout the next years Ever since it has been introduced as a foreign language to German schools new concepts and methods to improve foreign language teaching have evolved Bilingual education is one of those concepts Being used in many countries and educational contexts to enhance second language learning it has also found its way into German school types As a method of instruction that involves a higher number of classes held in English per week and additionally other subjects

being taught to a greater extent in that foreign language than in traditional educational programs it was introduced developed and often criticized Due to its success the demand for this more intense form of second language learning has increased and more researchers have investigated the outcomes of bilingual education Is such a program beneficial to children or does it have negative consequences on their overall performance at school Would a higher number of English classes per week be sufficient or do other subjects have to be taught in English and above all what subjects should that be without risking the students to have problems understanding their content And finally do students in bilingual programs have a higher language competence than students in comparable traditional English programs These are all questions that are connected to the research on bilingual programs and what factors contribute to their success or what points to their weaknesses The last of the three questions emphasizes the aspect of bilingual education that will be the focus of this bachelor s thesis namely language competence Due to the fact that an assessment of the actual language competence could not be conducted in the given time period the center of this investigation will be the subjective point of view of teachers and students thus a self assessment based on the categories of the Common European Framework of Reference for Languages
