Dochy, 2012-12-06 Achievement assessment has undergone a major shift from what some call a culture of testing to a culture of assessment Nowadays a strong emphasis is placed on the integration of assessment and instruction on assessing processes rather than just products and on evaluating individual progress relative to each student's starting point This book addresses assessment issues in light of the present state of affairs The first part discusses new alternatives in the assessment of achievement in various subject areas focusing on agenda practice impact and evaluation of the assessment The second part deals with issues related to assessment of the learning process specifically questions concerning the assessment of individual differences in prior knowledge learning skills and strategies *Lessons for Education from COVID-19 A Policy Maker's Handbook for More Resilient Systems* OECD, 2020-12-15 The COVID 19 pandemic has shaken long accepted beliefs about education showing that learning can occur anywhere at any time and that education systems are not too heavy to move When surveyed in May 2020 only around one fifth of OECD education systems aimed to reinstate the status quo Policy makers must therefore maintain the momentum of collective emergency action to drive education into a new and better normal *The Power of Protocols* Joseph P.
