My belief about myself as a learner when I entered the class was a positive one. I attended a college prep school for high school and went to Oregon State University last year. I had plenty of practice with different learning techniques and found what works well for me. I believe I'm more of a visual learner than an auditory learner. It is easier to see a powerpoint and retain the knowledge then listen to a lecture and have the same retention. Entering the class I thought I liked working in groups more than working individually on projects, but that has since changed. I think it is more beneficial to me to work alone because I can get more done. When I entered the class I believed that reading the material closer to the due date was a better idea because I may not remember what I had read if I didn't.

What I have discovered about myself, as a learner over the term is vast. I learned that I can read the material way in advance and just briefly skim over the text and remember just about everything, were as I thought reading closer was more beneficial. I also learned that working in groups really isn't my specialty. I prefer working by myself because I'm able to get a lot more done and not have to worry about other people forgetting their part of the project. I don't like having to worry about other people not following through. I also learned that looking at the daily record in advanced helped me

*The Humble Essay* Roy K. Humble, 2023-04-01 *The Humble Essay* is so much more than a writing textbook. It gives you tools, tips, and tricks that actually explain what a writer does. It doesn't sugarcoat the process or dumb down the very real challenges that entering a college writing space requires. This book is more like a friend. It's the kind of friend that will coach you through a tough time and encourage you, and it will make you laugh while you go through it. It's the kind of friend who holds your hair back when you're sick of writing and gives you the courage to try again. Roy K. Humble is the kind of writing teacher who understands the struggle of learning how to write like a college student and doesn't just tell you what you want to hear. His lessons here are profound but in the sense that they are delivered by someone who wants you to feel included in the conversation about what good college writing should be. He writes to students in language they can understand without becoming English majors and with just enough humor to keep them reading. He writes for faculty, moving step by step through the unadorned guiding principles of effective formal writing so that faculty have a great framework on which to build their classes. Perhaps most importantly, Humble understands that the price of a book matters to students, so his books are affordable. From every perspective, Humble gets it. *The Humble Essay* has students covered on these important topics: Understanding the college essay as an idea, Grasping the stages of the writing process, Organizing the college essay around cohesive paragraphs, Thinking for yourself as a college student, Gathering and synthesizing sources and information, Guiding readers through a thoughtful college essay.

**Think Write** Nigel Ajay Kumar, 2022-01-10 *Think Write* is a comprehensive critical thinking, research methodology, and academic writing handbook. It is designed to aid students to understand and meet the varied expectations of higher theological studies. Concepts such as critical thinking, theological thinking, problem statement, primary question, methodology, plagiarism, citation format, can all be difficult to grasp. This book explains each of these in a way that would make sense to MTh and PhD students from the various theological departments. Along with advice to enhance academic research and reading, practical suggestions are offered to improve research assignments, Thesis Proposals, and dissertations. Included is a citation guide based on the Chicago Manual of Style.

**Reconstructing Response to Student Writing** Dan Melzer, 2023-08-07 In *Reconstructing Response to Student Writing*, Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self-assessment are more central than teacher response. Presenting the results of a national study of teacher and peer response and student self-assessment at institutions of higher education across the United States, Melzer analyzes teacher and peer response to over 1,000 pieces of student writing as well as 128 student portfolio reflection essays. He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines. Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on engaging in dialogue with student self-assessment and

peer response focusing on growth and transfer rather than products and grades *Reconstructing Response to Student Writing* especially when taken together with Melzer's previous book *Assignments across the Curriculum* provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States
