Politics of the Textbook** Heather Hickman,Brad J. Porfilio,2012-10-29 In an era when corporate and political leaders are
using their power to control every aspect of the schooling process in North America there has been surprisingly little
research on the impact of textbook content on students The contributors of this volume and its partner *The New Politics of
the Textbook* Problematizing the Portrayal of Marginalized Groups in Textbooks guide educators school administrators
academics and other concerned citizens to unpack the political social and cultural influences inherent in the textbooks of
core content areas such as math science English and social science They urge readers to reconsider the role textbooks play
in the creation of students political social and moral development and in perpetuating asymmetrical social and economic
relationships where social actors are bestowed unearned privileges and entitlements based upon their race gender sexuality
class religion and linguistic background Finally they suggest ways to resist the hegemony of those texts through critical
analyses critical questioning and critical pedagogies **Going Back to Our Future II** Jon Pedersen,Kevin D.
Finson,Barbara S. Spector,2015-08-01 Who were the pioneers in science education and what motivated them to do what they
did This book is the second volume of an attempt to capture and record some of the answers to these questions either from
the pioneers themselves or from those persons who worked most closely with them As with the first volume we have
attempted to include as many pioneers as possible but we know that there are still many that are not included in this or the
previous volume As we have posed questions rummaged through files and oft neglected books and probed the memories of
many individuals we have come to realize our list of true pioneers is ever growing As we consider our list of pioneers we
know that there are names on the list that most of us readily recognize We also fully realize that there are names of whom
few of us have heard yet who were significant in their roles as mentors or idea development and teaching We continue to be
impressed with our science education family tree ever branching out to more individuals and connections The stories in this
volume continue to demonstrate how vital this network was in supporting the individual pioneers during their journey in
difficult times and continues to be for those of us today in our own enterprise *Catalogue of Title-entries of Books and
