**The Development of**

**International Human Rights Law** David Weissbrodt, 2017-07-05 The essays selected for this volume written by some of the world's most respected experts on human rights encompass the development of human rights law from its philosophical underpinnings and address many of its current controversies. The collected essays explore the drafting of major human rights instruments including the political challenges that shaped those instruments, examine the interrelationship of various claimed rights and identify factors producing compliance with and violation of human rights law. Other contributions analyze the role of non-governmental organizations in achieving better human rights protections as well as the danger of claiming too many rights and the tension between rights and security. Contrasting viewpoints in several essays highlight some of the key conflicts in the field. An introductory essay provides a roadmap marking the collection's major themes and tracing the relationship between those themes. Taken together, the essays emphasize the legal underpinnings of the human rights regime and as such, the collection provides an essential wide-ranging account of this important part of international law procedure and practice.

**Women and International Human Rights Law** Gayatri Patel, 2019-12-06 This book presents the findings of the first comprehensive study on the most recent and most unique and innovative method of monitoring international human rights law at the United Nations. The book addresses the topics with regard to international human rights law and will be of interest to researchers, academics, and students interested in the monitoring and implementation of international human rights law at the United Nations. In addition, it will form supplementary reading for those students studying international human rights law on undergraduate programmes and will also appeal to academics and students with interests in political sciences and international relations.

**Arid Lands Water Evaluation and Management** Robert Maliva, Thomas Missimer, 2012-06-09 A large part of the global population lives in arid lands which have low rainfall and often lack the water required for sustainable population and economic growth. This book presents a comprehensive description of the hydrogeology and hydrologic processes at work in arid lands. It describes the techniques that can be used to assess and manage the water resources of these areas with an emphasis on groundwater resources, including recent advances in hydrologic evaluation and the differences between how aquifer systems behave in arid lands versus more humid areas. Water management techniques are described and summarized to show how a more comprehensive approach to water management is required in these areas, including the need to be aware of cultural sensitivities and conditions unique to many arid regions. The integration of existing resources with the addition of new water sources such as desalination of brackish water and seawater, along with reusing treated wastewater, will be required to meet future water supply needs. Also, changing climatic conditions will force water management systems to be more robust so that future water supply demands can be met.

as droughts become more intense and rainfall events become more intense A range of water management techniques are described and discussed in order to illustrate the methods for integrating these measures within the context of arid lands conditions     *Monthly Catalog of United States Government Publications* United States. Superintendent of Documents,1985 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index     *Torture as Tort* Craig Martin Scott,2001-05-22 The controversial nature of seeking globalised justice through national courts has become starkly apparent in the wake of the Pinochet case in which the Spanish legal system sought to bring to account under international criminal law the former President of Chile for violations in Chile of human rights of non Spaniards Some have reacted to the involvement of Spanish and British judges in sanctioning a former head of state as nothing more than legal imperialism while others have termed it positive globalisation While the international legal and associated statutory bases for such criminal prosecutions are firm the same cannot be said of the enterprise of imposing civil liability for the same human rights violating conduct that gives rise to criminal responsibility In this work leading scholars from around the world address the host of complex issues raised by transnational human rights litigation There has been to date little treatment let alone a comprehensive assessment of the merits and demerits of US style transnational human rights litigation by non American legal scholars and practitioners The book seeks not so much to fill this gap as to start the process of doing so with a view to stimulating debate amongst scholars and policy makers The book s doctrinal coverage and analytical inquiries will also be extremely relevant to the world of transnational legal practice beyond the specific question of human rights litigation Cited in *Nevsun Resources Ltd v Araya* 2020 SCC 5     **Keeping Out the Other** David Brotherton,Philip Kretsedemas,2008 With contributions from social scientists policy analysts legal experts community organisers and journalists this text provides a history and analysis of immigration enforcement in the United States     *War Crimes Against Women* Kelly Dawn Askin,2023-08-07 This book examines laws and customs of war prohibiting rape crimes dating back thousands of years even though gender specific crimes particularly sex crimes have been prevalent in wartime for centuries It surveys the historical treatment of women in wartime and argues that all the various forms of gender specific crimes must be prosecuted and punished It reviews the Nuremberg and Tokyo War Crimes Tribunals from a gendered perspective and discusses how crimes against women could have been prosecuted in these tribunals and suggests explanations as to why they were neglected It addresses the status of women in domestic and international law during the past one hundred years including the years preceding World War II and in the aftermath of this war and in the years immediately preceding the Yugoslav conflict The evolution of the status and participation of women in international human rights and international humanitarian law is analyzed including the impact domestic law and practice has had on international law and practice Finally this book reviews gender specific crimes in the Yugoslav conflict and presents arguments as to how various gender specific crimes including

rape forced prostitution forced impregnation forced maternity forced sterilization genocidal rape and sexual mutilation can be and why they must be prosecuted under Articles 2 5 of the Yugoslav Statute i e as grave breaches of the Geneva Conventions torture violations of the laws of war violations of the customs of war genocide and crimes against humanity The author a human rights attorney academic and activist spent three years researching both the treatment of women during periods of armed conflict and humanitarian laws protecting women from war crimes

**Armed Non-State Actors in International Humanitarian and Human Rights Law** Konstantinos Mastorodimos,2017-05-15 The accountability of armed non state actors is a neglected field of international law overtaken by the regimes of state responsibility and individual criminal accountability as well as fears of legitimacy Yet armed non state actors are important players in the international arena and their activities have significant repercussions This book focuses on their obligations and accountability when they do not function as state agents regardless of the existence or extent of accountability of their individual members The author claims that their distinct features lead to their classification into three different types de facto entities armed non state actors in control of territory and common article 3 armed non state actors The mechanisms that trigger the applicability of humanitarian and human rights law regimes are examined in detail as well as the framework of obligations In both cases the author argues that armed non state actors should not be treated as entering international law and process exclusively through the state The study concludes by focussing on their accountability in international humanitarian and human rights law and more specifically to the rules of attribution remedies and reparations for violations of their primary obligations
