International Relations Narratives Riikka Kuusisto, 2019-11-12 This book presents an innovative approach to research in International Relations by examining 12 theoretical contributions to the field as competing narrative bids It demonstrates the pervasive nature of storytelling and considers narratives as a means of causal explanation in the human sciences By introducing four classic literary plot structures with their respective characters events moods and denouements the book divides IR literature into tragedies romances epics comedies and ironic satirical stories For each plot type its characteristic features logic and appeal are first reprised through some well known prose examples before being employed in the analysis of major IR texts King Lear for example helps bring out the tragic logic of Politics among Nations and Sleeping Beauty demonstrates the romantic appeal inherent in The End of History Twelfth Night is used to approach The Transformation of Political Community as a comedy and A Modest Proposal paves the way for the examination of Bananas Beaches and Bases as irony satire Rather than assess the absolute merits and shortcomings of the competing theories the book discusses the relative strengths and weaknesses of stories that adhere to different plots in giving meaning to actors and events in the international arena Discussing a broad range of theories this text will be of interest to scholars and students of International Relations and World Politics including various subcommunities such as specialists in peace research and Feminist IR

International Relations Manuela Spindler, 2013-04-10 The book is written for active learners those keen on cutting their own path through the complex and at times hardly comprehensible world of THEORY in International Relations To aid this process as much as possible this book employs the didactical and methodical concept of integrating teaching and self study The criteria for structured learning about IR theory will be derived from an extensive discussion of the questions and problems of philosophy of science Part 1 Theory of IR refers to the scientific study of IR and covers all of the following subtopics the role and status of theory in the academic discipline of IR the understanding of IR as a science and what a scientific theory is the different assumptions upon which theory building in IR is based the different types of theoretical constructions and models of explanations found at the heart of particular theories and the different approaches taken on how theory and the practice of international relations are linked to each other The criteria for the structured learning process will be applied in Part 2 of the book during the presentation of five selected theories of International Relations The concept is based on learning through example that is the five theories have been chosen because when applying the criteria developed in Part 1 of the book each single theory serves as an example for something deeply important to learn about THEORY of IR more generally

International Relations Theories Timothy Dunne, Milja Kurki, Steve Smith, 2021 Unrivalled coverage of international relations theories from leading experts whose case studies show you how theory can be applied to address concrete political problems In this best selling text contributors to Dunne Kurki and Smith explore the full spectrum of

theoretical perspectives and debates ranging from the historically dominant traditions of realism liberalism and Marxism to prominent critical approaches from feminism and postcolonialism to green theory Each chapter is dedicated to a particular theory and features a case study that shows how theory can be used to explain real world political dilemmas New To This Edition A new chapter sixteen on global international relations encourages you to explore the context in which IR developed and appreciate the importance of viewing international relations theories from diverse representative perspectives Chapters have been fully revised to reflect recent events including the Trump Presidency developments in climate change politics and the Covid 19 pandemic The case studies help you to apply theories to real world issues Revised introduction to each part provides an overarching narrative to the text helping you to understand and interpret different approaches Updated online resources include guidance on answering case study questions encouraging you to reflect upon and critically evaluate what you have learnt Book jacket

The Palgrave Handbook on the Pedagogy of International Relations Theory Jamie Frueh, Jacqui Ala, Michael P.A. Murphy, Paul F. Diehl, 2025-02-11 The Palgrave Handbook on the Pedagogy of International Relations Theory is a collection that explores how best to teach the systems of thought that organize the study of international relations and global politics All chapters document and advance intradisciplinary conversations about the challenge of helping students understand the nuances of IR theory Authors document strategies they have successfully applied to that challenge in a variety of contexts and encourage readers to creatively adapt to the challenges of their own pedagogical contexts The handbook is organized around four themes teaching theory for particular audiences and classroom contexts tips for teaching specific theories an exploration of pedagogical approaches to teaching theory and pedagogical considerations specific to courses in geographic regions

International Relations' Last Synthesis? J. Samuel Barkin, Laura Sjoberg, 2019-02-12 Many scholars intentionally or unintentionally have entangled constructivisms and critical theories in problematic ways either by assigning a critical theoretical politics to constructivisms or by assuming the appropriateness of constructivist epistemology and methods for critical theorizing IR s Last Synthesis makes the argument that these connections mirror IR s grand theoretical syntheses of the 1980s and 1990s and have similar constraining effects on the possibilities of IR theory They have been made without adequate reflection in contradiction to the base assumptions of each theoretical perspective and to the detriment of both knowledge accumulation about global politics and theoretical rigor in disciplinary IR It is not that constructivisms and critical theories have no common ground rather the fact that it has become routine for IR scholars to overstate their common ground is counterproductive to the discovery and utilization of their potential dialogues To that end IR s Last Synthesis argues that scholars using the two in conjunction should be cognizant of rather than gloss over the tensions between the approaches and the tools they have to offer Along these lines the book uses the concept of affordances to look at what each has to offer the other and to argue for a modest reflective specified return to constructivist and critical IR theorizing By rejecting its over simple syntheses this book hews a road toward reviving IR

theorizing **International Relations Theory** Cynthia Weber, 2005 This innovative textbook introduces students to the main theories in international relations The 2nd edition includes new chapters on the clash of civilizations and Empire

Advanced Introduction to International Relations Benjamin de Carvalho, Harvard Leira, 2025-05-14 This insightful Advanced Introduction presents a succinct overview of International Relations challenging assumptions addressing contemporary issues and critically examining fundamental aspects of the field Decolonising International Relations Nirmal Jindal, Kamal Kumar, 2025-09-12 This volume critically analyses the theories and concepts of international relations IR which will be instrumental in understanding IR from a non western perspective Owing to its emphasis on the need to decolonise the discipline of IR alternate perspectives from the global South have been explored and discussed in detail The book provides new insights to make the discipline more inclusive universal and contributory to world peace and security It lucidly enumerates on the concepts of state sovereignty power conflict security diplomacy human rights development market inequalities and migration from a non Eurocentric lens bringing distinct perspectives and experiences to the fore Expanding on the Indian foreign policy of Vasudev Kutumbakam it highlights India s policy of multi alliances and multilateralism and also refers to India s contributions during the COVID 19 pandemic and its drive to champion the cause of marginalised nations by reforming international institutions and pressing for development with sustainability It is testament to India s commitment to global security through cooperation and collective action This book will be useful to the Departments of Political Science Global Studies International Studies and South Asian studies It will be an indispensable resource for researchers social scientists and general readers interested to understand the theories and key concepts of IR especially from an Indian perspective *Rethinking Power, Institutions and Ideas in World Politics* Amitav Acharya, 2014-01-10 The study of international relations has traditionally been dominated by Western ideas and practices and marginalized the voice and experiences of the non Western states and societies As the world moves to a post Western era it is imperative that the field of IR acquires a more global meaning and relevance Drawing together the work of renowned scholar Amitav Acharya and framed by a new introduction and conclusion written for the volume this book exposes the narrow meaning currently attached to some of the key concepts and ideas in IR and calls for alternative and broader understandings of them The need for recasting the discipline has motivated and undergirded Acharya s own scholarship since his entry into the field over three decades ago This book reflects his own engagement quarrels and compromise and concludes with suggestions for new pathways to a Global IR a forward looking and inclusive enterprise that is reflective of the multiple and global heritage of IR in an changing and interconnected world It is essential reading for anyone who is concerned about the history development and future of international relations and international relations theory **Friendship among nations** Evgeny Roshchin, 2017-11-17 This is the first book length study of the role that friendship plays in diplomacy and international politics Through an examination of a vast amount of sources ranging from diplomatic letters and bilateral treaties to poems

and philosophical treatises it analyses how friendship has been talked about and practised in pre modern political orders and modern systems of international relations The study highlights how instrumental friendship was for describing and legitimising a range of political and legal engagements with foreign countries and nations It emphasises contractual and political aspects in diplomatic friendship based on the idea of utility It is these functions of the concept that help the world stick together when collective institutions are either embryonic or no more *Unnatural States* Peter Ian Lomas,2017-09-08

Unnatural States is a radical critique of international theory in particular of the assumption of state agency that states act in the world in their own right Peter Lomas argues that since the universal states system is inequitable and rigid and not all states are democracies anyway this assumption is unreal and to adopt it means reinforcing an unjust status quo Looking at the concepts of state nation and agency Lomas sees populations struggling to find an agreed model of the state owing to inherited material differences and unsurprisingly among theorists of the nation only controversy and a great confusion of terms Meanwhile the functional incarnations of the state agent are caricatures the mandarin state the lawyer state the landlord state the heir to history state and the patriot state Yet recent developments in international theory constructivism scientific realism postmodernism sacrifice state agency only at the price of an unhelpful abstraction The states system is dysfunctional and obsolete Lomas contends and international theory must be recast with morality as central to inspire and to guide historic change He focuses in his conclusion on prescriptions for change led by four moral concerns human rights weapons of mass destruction relations between rich and poor societies and the environment I begin this book writes Lomas with the commonest commonplace of international theory to expose it as a meaningless cliché In the masterly hands of Hobbes it was elaborated into a shock formula for organized society a reading of history as civilization's failure Kant sought to rescue morality from Hobbes and create the structures of modernity but Kant's influence is coming to an end In the Cold War politicians disagreeing over another philosopher almost brought the world to an end Hence the challenges of our time These are primary and profound Philosophers have done much to define the modern world The point of international theory is to change it **The Architects of International Relations** Jan Stöckmann,2022-03-03

Based on extensive archival research this book provides a new and stimulating history of International Relations IR as an academic discipline Contrary to traditional accounts it argues that IR was not invented by Anglo American men after the First World War Nor was it divided into neat theoretical camps To appreciate the twists and turns of early IR scholarship the book follows a diverse group of men and women from across Europe and beyond who pioneered the field since 1914 Like architects they built a set of institutions university departments journals libraries etc but they also designed plans for a new world order draft treaties petitions political commentary etc To achieve these goals they interacted closely with the League of Nations and its bodies for intellectual cooperation until the Second World War put an end to their endeavour Their story raises broader questions about the status of IR well beyond the inter war period **Decoding the Rise of China** Tse-Kang Leng,Rumi Aoyama,2018-05-17

This edited collection provides a synthetic analysis of the rise of contemporary China and its impact on the current global system from a range of Asian and Western perspectives Highlighting Taiwanese and Japanese viewpoints the book considers a macro integrated vision of the rise of China and examines the vital cultural factors which link domestic politics and foreign policy in the Sino Japanese relationship The book addresses key policy matters such as the internationalization of the Chinese currency and Arctic diplomacy and provides a key reference on contemporary Chinese foreign policy and the Sino Japanese relationship for students academics experts and policy makers in the field of Area Studies History and International Relations

Environmental Security in the Anthropocene Judith Nora Hardt, 2017-09-22 This book provides a critical assessment of the theories and practice of environmental security in the context of the Anthropocene The work analyses the intellectual foundations the evolution and different interpretations strengths and potential of the link between environment and security but also its weaknesses incoherencies and distortions To do so it employs a critical environmental security studies analytical framework and uniquely places this analysis within the context of the Anthropocene Furthermore the book examines the practice theory divide and the political implementation of the environmental security concept in response to global environmental change and in relation to different actors It pays significant attention to the Environment and Security Initiative ENVSEC which is led by different programs of the United Nations the OSCE and until recently by the North Atlantic Treaty Organization NATO among others and has largely been overlooked in the academic literature to date The goal is to study how environmental security practice could inform and shape the environmental security theory and also to explore how conversely new theoretical insights could contribute to the enhancement of environmental security activities This book will be of great interest to students and academic scholars of Environmental Security Critical Security Studies Green Political Theory Global Governance and International Relations in general

Essays on Evolutions in the Study of Political Power Giulio M. Gallarotti, 2021-11-24 This book deals with the most important developments in the study of political power over the last four decades From the writings of the great Greek philosophers of antiquity to the present the idea of power has been the major subject in the study of politics Indeed some would say it defines the very field of politics itself as a social science Penned by the leading scholars in the field this collection gives a broad overview of the most important issues in the study of political power tracing the evolution of scholarly thinking about them and in doing so revealing crucial innovations therein This will be a major contribution in the understanding of the concepts and practices of how power manifests itself across social and political contexts This book will be of great interest to scholars students and individuals who wish to understand the very foundations of social and political life The chapters in this book were originally published as a special issue of the Journal of Political Power volume 14 issue 1 2021

The Politics of International Law Nicole Scicluna, 2021 The Politics of International Law offers an introduction to the role of law in contemporary international affairs Through a case study driven analysis of topics such as human rights the use of force international environmental law international trade law

international criminal justice and the right to self determination the book explains the interaction between law and politics in the world today demonstrating that one cannot be understood without the other The book is divided into two parts Part I introduces contemporary international law with a focus on constitutive legal principles such as sovereignty territorial integrity and the legal equality of states Through these introductory chapters students are encouraged to take a holistic view of the processes and actors that drive international affairs and explore the fascinating paradox that while international law is largely created through political processes it also constitutes the environment in which international politics is practiced Part II builds on the foundations laid in Part I to analyze contemporary controversies in international law and politics Chapters focus on a number of substantive issue areas including international environmental law international economic law human rights law self determination and secession the law governing the use of force and international criminal justice This book is written to impart on readers a deepened understanding of both the possibilities and limits of international law as a tool for structuring relations in the world Digital Formats and Resources Also available as an e book with functionality navigation features and links that offer extra learning support **Geopolitical Economy of Energy and Environment** ,2017-07-10
