Introduction to African American Studies Talmadge Anderson, James Benjamin Stewart, 2007 There is an ongoing debate as to whether African American Studies is a discipline or multidisciplinary or interdisciplinary field Some scholars assert that African American Studies use a well defined common approach in examining history politics and the family in the same way as scholars in the disciplines of economics sociology and political science Other scholars consider African American Studies multidisciplinary a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses be they anthropological psychological historical etc to study the African world experience In this model the boundaries between traditional disciplines are accepted and researches in African American Studies simply conduct discipline based an analysis of particular topics Finally another group of scholars insists that African American Studies is interdisciplinary an enterprise that generates distinctive analyses by combining perspectives from d *Handbook of Black Studies* Molefi Kete Asante, Maulana Karenga, 2006 Publisher Description An Introduction to Black Studies Eric R. *Transformations in Africana Studies* Adebayo Oyebadé, 2023-02-07 This book introduces readers to the rich discipline of Africana Studies reflecting on how it has developed over the last fifty years as an intellectual enterprise for knowledge production about Africa and the African diaspora The African world has always had a wealth of indigenous knowledge systems but for the greater part of the scholarly history hegemonic Western epistemologies have denied the authenticity of African indigenous ways of knowing The post colonial era has seen steady and deliberate efforts to

Henry, 2016-12-11 This

book aims to expand what scholars know and who is included in this discussion about black studies which aids in the democratization of American higher education and the deconstruction of traditional disciplines of high education to facilitate a sense of social justice By challenging traditional disciplines black studies reveals not only the political role of American universities but also the political aspects of the disciplines that constitute their core While black studies is post modern in its deconstruction of positivism and universalism it does not support a radical rejection of all attempts to determine truth Evolving from a form of black cultural nationalism it challenges the perceived white cultural nationalist norm and has become a critical multiculturalism that is more global and less gendered Henry argues for the inclusion of black studies beyond the curriculum of colleges and universities     **The Black Revolution on Campus** Martha Biondi, 2014-03-21

*Color-Line to Borderlands* Johnnella E. Butler, 2011-07-01 Ethnic Studies has drawn higher education usually kicking and screaming into the borderlands of scholarship pedagogy faculty collegiality and institutional development Johnnella E Butler writes in her Introduction to this collection of lively and insightful essays Some of the most prominent scholars in Ethnic Studies today explore varying approaches multiple methodologies and contrasting perspectives within the field Essays trace the historical development of Ethnic Studies its place in American universities and the curriculum and new directions in contemporary scholarship The legitimation of the field the need for institutional support and the changing relations between academic scholarship and community activism are also discussed The institutional structure of Ethnic Studies continues to be affected by national regional and local attitudes and events and Ronald Takaki's essay explores the contested terrains of these culture wars Manning Marable delves into theoretical aspects of writing about race and ethnicity while John C Walter surveys the influence of African American history on U S history textbooks Elizabeth Cook Lynn and Craig Howe explain why American Indian Studies does not fit into the Ethnic Studies model and Lauro H Flores traces the historical development of Chicano a Studies forged from the student and community activism of the late 1960s Ethnic Studies is simultaneously discipline based and interdisciplinary self containing and overlapping This volume captures that dichotomy as contributors raise questions that traditional disciplines ignore Essays include Lane Ryo Hirabayashi and Marilyn Caballero Alquizola on the gulf between postmodernism and political and institutional realities Rhett S Jones on the evolution of Africana Studies and Judith Newton on the trajectories of Ethnic Studies and Women's Studies and their relations with marginalized communities Shirley Hune and Evelyn Hu DeHart each make a case for the separation of Asian American Studies from Asian Studies while Edna Acosta Bel n argues for a hemispheric approach to Latin American and U S Latino a Studies T V Reed rounds out the volume by offering through cultural studies bridges to the twenty first century

*Dispatches from the Ebony Tower* Manning Marable, 2001-03-01 What constitutes black studies and where

does this discipline stand at the end of the twentieth century In this wide ranging and original volume Manning Marable one of the leading scholars of African American history gathers key materials from contemporary thinkers who interrogate the richly diverse content and multiple meanings of the collective experiences of black folk Here are numerous voices expressing very different political cultural and historical views from black conservatives to black separatists to blacks who advocate radical democratic transformation Here are topics ranging from race and revolution in Cuba to the crack epidemic in Harlem to Afrocentrism and its critics All of these voices however are engaged in some aspect of what Marable sees as the essential triad of the black intellectual tradition describing the reality of black life and experiences critiquing racism and stereotypes or proposing positive steps for the empowerment of black people Highlights from Dispatches from the Ebony Tower Henry Louis Gates Jr and Manning Marable debate the role of activism in black studies John Hope Franklin reflects on his role as chair of the President s race initiative Cornel West discusses topics that range from the future of the NAACP through the controversies surrounding Louis Farrakhan and black nationalism to the very question of what race means Amiri Baraka lays out strategies for a radical new curriculum in our schools and universities Marable s introduction provides a thorough overview of the history and current state of black studies in America

One-Party Classroom David Horowitz, Jacob Laksin, 2009-03-10 David Horowitz has single handedly exposed the intellectual corruption that exists within the classrooms of American colleges Like all forms of corruption indoctrination flourishes when kept in the dark Here Horowitz turns on the bright lights to expose what has become profoundly wrong with our colleges and universities We are all in his debt Ward Connerly former regent University of California David Horowitz and coauthor Jacob Laksin take us inside twelve major universities where radical agendas have been institutionalized and scholarly standards abandoned The schools they examine are not the easily avoided bottom of the barrel Rather they are an all too representative sampling of American higher education today Horowitz and Laksin have conducted the first comprehensive in depth multiyear investigation of what is being taught in colleges and universities across the country public to private from large state schools to elite Ivy League institutions They have systematically scrutinized course catalogs reading lists professors biographies scholarly records and the first person testimonies of students administrators and faculty Citing more than 150 specific courses they reveal how academic standards have been violated and demonstrate beyond dispute that systematic indoctrination in radical politics is now an integral part of the liberal arts curriculum of America s colleges The extreme ideological cant that today s students are being fed includes Promoting Marxist approaches as keys to understanding human societies with no mention of the bloody legacy of these doctrines and total collapse in the real world of the societies they created Instilling the idea that racism brutally enforced by a white male patriarchy to oppress people of color and other marginalized groups has been the organizing principle of American society throughout its history and into the present Requiring students to believe that gender is not a biological characteristic but a socially created aspect of human behavior designed by men to oppress women

Persuading students that America and Israel are imperialistic and racist states and that the latter has no more right to exist than the South African regime in the days of apartheid In page after shocking page Horowitz and Laksin demonstrate that America s colleges and universities are platforms for a virulent orthodoxy that threatens academic ideals and academic freedom In place of scholarship and the dispassionate pursuit of truth that have long been the hallmarks of higher learning the new militancy embraces activist zealotry and ideological fervor In disturbingly large segments of today s universities students are no longer taught how to think but are told what to think **We Can't Go Home Again** Clarence E.

Walker,2001-06-14 Afrocentrism has been a controversial but popular movement in schools and universities across America as well as in black communities But in We Can t Go Home Again historian Clarence E Walker puts Afrocentrism to the acid test in a thoughtful passionate and often blisteringly funny analysis that melts away the pretensions of this therapeutic mythology As expounded by Molefi Kete Asante Yosef Ben Jochannan and others Afrocentrism encourages black Americans to discard their recent history with its inescapable white presence and to embrace instead an empowering vision of their African specifically Egyptian ancestors as the source of western civilization Walker marshals a phalanx of serious scholarship to rout these ideas He shows for instance that ancient Egyptian society was not black but a melange of ethnic groups and questions whether in any case the pharaonic regime offers a model for blacks today asking if everybody was a King who built the pyramids But for Walker Afrocentrism is more than simply bad history it substitutes a feel good myth of the past for an attempt to grapple with the problems that still confront blacks in a racist society The modern American black identity is the product of centuries of real history as Africans and their descendants created new hybrid cultures mixing many African ethnic influences with native and European elements Afrocentrism replaces this complex history with a dubious claim to distant glory Afrocentrism offers not an empowering understanding of black Americans past Walker concludes but a pastiche of alien traditions held together by simplistic fantasies More to the point this specious history denies to black Americans the dignity and power that springs from an honest understanding of their real history From Black Power to Black Studies

Fabio Rojas,2010-09-01 The black power movement helped redefine African Americans identity and establish a new racial consciousness in the 1960s As an influential political force this movement in turn spawned the academic discipline known as Black Studies Today there are more than a hundred Black Studies degree programs in the United States many of them located in America s elite research institutions In From Black Power to Black Studies Fabio Rojas explores how this radical social movement evolved into a recognized academic discipline Rojas traces the evolution of Black Studies over more than three decades beginning with its origins in black nationalist politics His account includes the 1968 Third World Strike at San Francisco State College the Ford Foundation s attempts to shape the field and a description of Black Studies programs at various American universities His statistical analyses of protest data illuminate how violent and nonviolent protests influenced the establishment of Black Studies programs Integrating personal interviews and newly discovered archival

material Rojas documents how social activism can bring about organizational change Shedding light on the black power movement Black Studies programs and American higher education this historical analysis reveals how radical politics are assimilated into the university system
