Kwazulu Natal 2013 Trial Paper:

The Three Regularities in Development Moazam Mahmood, 2018-06-06 The financial crisis in advanced economies and its impact on developing countries has put the longer term agenda of development structural transformation of countries of their growth jobs poverty and distribution on the analytic and policy backburner Day to day management of macro fundamentals in the global economy and the labour market have consumed decision makers with faltering GDP growth soaring unemployment and a resurgent threat of deflation Without understanding and addressing the structural constraints and imbalances underpinning such global problems the world economy is doomed to experience an increasing number of crises and emerging dualisms between countries The aim of this book is to bring back a balance to the development debate by re focusing on the structural development challenges faced by developing countries The book develops a coherent analytical framework supported by a large body of new empirical evidence linking three core dimensions the structure of growth employment and their macro drivers Then for each of these dimensions and relationships a variety of effective policies are also identified and elucidated with the added granularity of country cases *Ethnographies of Power* Sharad Chari, Mark Hunter, Melanie Samson, Jennifer A Devine, Michael Ekers, Jennifer Greenburg, Bridget Kenny, Stefan Kipfer, Alex Loftus, Zachary Levenson, Ahmed Veriava, 2022-08 In our time of rampant inequality imperial capitalist plunder violence and ecocide when radical concepts from the past seem inadequate how do researchers and students of ethnographic work decide what concepts to work with or renew Gillian Hart is a key thinker in radical political economy geography development studies agrarian studies and Gramscian critique of postcolonial capitalism In *Ethnographies of Power* each contributor engages her work and applies it to their own field of study A major contribution of this collection is the merging of theory with praxis resulting in invaluable research tools for postgraduate students These include applying gendered labour practices among workers in South Africa reading racial capitalism through agrarian debates using relational comparison in an ethnography of schooling across Durban reworking multiple socio spatial trajectories in Guatemala s Maya Biosphere Reserve critiquing the notion of South Africa s second economy revisiting development processes and Development discourses in US military contracting reconsidering Gramsci s conjunctures geographically finding divergent articulations in Cape Town land occupations and exploring nationalism as central to revaluing recyclables at a Soweto landfill Together the chapters show how important the ongoing reworking of radical concepts is to ethnographic critiques of power *Ethnographies of Power* offers an invaluable toolkit for activists and scholars engaged in sharpening their critical concepts for social and environmental change towards a collective future *The Post-Election Violence in Kenya* Sostheness Francis Materu, 2014-12-04 Since the historic Nuremberg Trial of 1945 an international customary law principle has developed that commission of a core crime under international law war crimes genocide crimes against humanity and aggression should not go unpunished History shows that when in Africa such violations occurred especially as a result of election disputes national

and regional actors including the African Union resorted to political rather than legal responses. However, when crimes against humanity were alleged to have been committed in Kenya during the 2007-2008 post-election violence, a promising road map for criminal accountability was agreed upon alongside a political solution. In the spirit of this road map, the author analyzes the post-election violence in Kenya from a legal point of view. He extensively examines legal options for domestic criminal accountability and discusses both retributive prosecutions and restorative justice, mainly truth commission mechanisms being the main legal responses to the gross violations of human rights. Furthermore, he thoroughly investigates the Kenya situation before the ICC and the legal and political responses to the ICC intervention in Kenya. Practitioners and academics in the field of international criminal law and related disciplines as well as political sciences and legal history will find in this book highly relevant information about alternative legal approaches of the fight against and punishment of crimes against humanity as defined under the ICC Statute.

Socialising the Biomedical Turn in HIV Prevention Susan Kippax, Niamh Stephenson, 2016-06-28 This book concerns HIV prevention In it the authors argue that until the world focuses its attention on the social issues carried and revealed by AIDS it is unlikely that HIV transmission will be eradicated or even significantly reduced The book argues that we are

currently witnessing the remedicalisation or the continuing biomedicalisation of HIV prevention which began in earnest after the development of successful HIV treatment and that this biomedical trajectory continues with the increasing push to use HIV treatments as prevention undermining what has been in many countries a successful prevention response This wide ranging study argues that HIV prevention involves enabling people and communities to discuss sex sexuality and drug use and informed by these discussion devising locally effective strategies for promoting safe sexual and drug injection practices

 Grace Gachanja, Gary J. Burkholder, Aimee Ferraro, 2018-08-29 While HIV AIDS is a global public health challenge its impact is arguably greatest in the Sub Saharan Africa SSA where new infections account for approximately 66% of the total number of HIV positive persons globally In SSA medical social and economic resources are limited thus necessitating innovative approaches to disease prevention One of the mechanisms of prevention that is most promising occurs through HIV disclosure to family members e g adult sexual partners generally and to children in particular Our emphasis in this eBook is on HIV disclosure to children because it has multiple benefits including improved adherence to antiretroviral medication treatment and understanding at an early age of the impact of sexual activity on the spread of HIV While there is a noticeable gap in research on HIV disclosure to younger children some of the general reasons for non disclosure include concerns about fear of adult partners leaving relationships and that children are too young to comprehend the severity of the situation and may tell others outside the family Thus it is critical to better understand how the HIV disclosure process happens or does not happen within HIV affected families as well as the best practices on how to disclose In this eBook we present a combination of empirical research studies and critical literature reviews that investigate the reasons for and for not disclosing HIV status within HIV affected families and provide evidence based practices that could be adopted by healthcare professionals to help HIV positive parents facilitate disclosure activities within these families This information can also be used by researchers practitioners and stakeholders who are in a position to influence policies on effective HIV disclosure practices guidelines and programs
