Micro Controller Based Automated Irrigation System:

Fertigation Technologies for Micro Irrigated Crops Megh R. Goyal, Lala I. P. Ray, 2021-06-14 This new volume addresses the global water crisis by presenting new ways to use irrigation water judiciously through innovative fertigation management. It looks at the research and review work done throughout the world on micro irrigation and the techno-economic feasibility of various fertigation irrigation water management systems. Taking a multidisciplinary perspective, the chapters look at using fertigation to increase the effectiveness of irrigation systems, crop performance evaluation of various crops under fertigation and irrigation methods, estimating levels of crop requirements, scheduling of fertigation and irrigation, new fertigation equipment and technology, cost components of the various irrigation and fertigation systems. *Automated and smart irrigation system using Arduino* Dr. Vijaya. N. Aher, 2025-09-23 It is with great happiness that I would like to acknowledge a great deal of people that get helped me extremely through the entire difficult challenging but a rewarding and interesting path towards some sort of Edited Book without having their help and support none of this work could have been possible. *Intelligent Technologies for Research and Engineering* S. Kannadhasan, R. Nagarajan, Alagar Karthick, K. K. Saravanan, Kaushik Pal, 2024-07-12 This volume explores diverse applications for automated machine learning and predictive analytics. The content provides use cases for machine learning in different industries such as healthcare, agriculture, cybersecurity, computing, and transportation. Key highlights of this volume include topics on engineering for underwater navigation and computer vision for healthcare and biometric applications. Chapters 1-4 delve into innovative signal detection, biometric authentication, underwater AUV localization, and COVID-19 face mask detection. Chapters 5-9 focus on wireless pH sensing, differential pattern identification, economic considerations in off-grid hybrid power, high optimization of image transmission, and ANN-based IoT bot traffic detection. Chapters 10-12 cover mixed signal VLSI design, pre-placement 3D floor planning, and bio-mimic robotic fish. Finally, Chapters 13 and 14 explore underwater robotic fish and IoT-based automatic irrigation systems, providing a comprehensive overview of cutting-edge technological advancements. The book is a resource for academics, researchers, educators, and professionals in the technology sector who want to learn about current trends in intelligent technologies.

The Smart Cyber Ecosystem for Sustainable Development Pardeep Kumar, Vishal Jain, Vasaki Ponnusamy, 2021-10-12 The Smart Cyber Ecosystem for Sustainable Development. As the entire ecosystem is moving towards a sustainable goal, technology-driven smart cyber system is the enabling factor to make this a success, and the current book documents how this can be attained. The cyber ecosystem consists of a huge number of different entities that work and interact with each other in a highly diversified manner. In this era when the world is surrounded by many unseen challenges and when its population is increasing and resources are decreasing, scientists, researchers, academicians, industrialists, government agencies, and other stakeholders are looking toward smart and intelligent cyber systems that can guarantee sustainable development for a better and healthier ecosystem. The main actors of this cyber ecosystem include the

Internet of Things IoT artificial intelligence AI and the mechanisms providing cybersecurity This book attempts to collect and publish innovative ideas emerging trends implementation experiences and pertinent user cases for the purpose of serving mankind and societies with sustainable societal development The 22 chapters of the book are divided into three sections Section I deals with the Internet of Things Section II focuses on artificial intelligence and especially its applications in healthcare whereas Section III investigates the different cyber security mechanisms Audience This book will attract researchers and graduate students working in the areas of artificial intelligence blockchain Internet of Things information technology as well as industrialists practitioners technology developers entrepreneurs and professionals who are interested in exploring designing and implementing these technologies

Internet of Things and Its Applications Sachi Nandan Mohanty,Jyotir Moy Chatterjee,Suneeta Satpathy,2021-11-25 This book offers a holistic approach to the Internet of Things IoT model covering both the technologies and their applications focusing on uniquely identifiable objects and their virtual representations in an Internet like structure The authors add to the rapid growth in research on IoT communications and networks confirming the scalability and broad reach of the core concepts The book is filled with examples of innovative applications and real world case studies The authors also address the business social and legal aspects of the Internet of Things and explore the critical topics of security and privacy and their challenges for both individuals and organizations The contributions are from international experts in academia industry and research

AI-Based Services for Smart Cities and Urban Infrastructure Lyu, Kangjuan,Hu, Min,Du, Juan,Sugumaran, Vijayan,2020-09-04 Cities are the next frontier for artificial intelligence to permeate As smart urban environments become possible probable and even preferred artificial intelligence offers the chance for even further advancement through infrastructure and industry boosting Opportunity overflows but without thorough research to guide a complicated development and implementation process urban environments can become disorganized and outright dangerous for citizens AI Based Services for Smart Cities and Urban Infrastructure is a collection of innovative research that explores artificial intelligence AI applications in urban planning In addition the book looks at how the internet of things and AI can work together to enable a real smart city and discusses state of the art techniques in urban infrastructure design construction operation maintenance and management While highlighting a broad range of topics including construction management public transportation and smart agriculture this book is ideally designed for engineers entrepreneurs urban planners architects policymakers researchers academicians and students
