Civil War Washington Susan C. Lawrence,2015-04 While it is impossible to re create the tumultuous Washington DC of the Civil War Civil War Washington sets out to examine the nation's capital during the Civil War along with the digital platform civilwardc.org that reimagines it during those turbulent years Among the

many topics covered in the volume is the federal government's experiment in compensated emancipation which went into effect when all of the capital's slaves were freed in April 1862. Another essay explores the city's place as a major center of military hospitals, patients and medical administration. Other contributors reflect on literature and the war, particularly on the poetry published in hospital newspapers and Walt Whitman's formative experiences with the city and its wounded. The digital project associated with this book offers a virtual examination of the nation's capital from multiple perspectives. Through a collection of datasets, visual works, texts and maps, the digital project offers a case study of the social, political, cultural and scientific transitions provoked or accelerated by the Civil War. The book also provides insights into the complex and ever-shifting nature of ongoing digital projects while encouraging others to develop their own interpretations and participate in the larger endeavor of digital history.

Management of Natural Resources, Sustainable Development and Ecological Hazards III C. A. Brebbia, S. S. Zubir, 2012. This book contains the proceedings of the third in a now biennial series organized by the Wessex Institute of Technology around the urgent need to determine solutions regarding sustainable development before our planet reaches a point of irreversibility. The aggressive search for new sources of energy and materials, the rapid rate at which natural resources are being consumed and the destructiveness of the resulting pollution are all having a negative impact on the planet that needs to be stopped if not reversed. As at the first two participants at this conference will take stock of our situation and try to facilitate constructive principles and policies for a way forward something that can only be done by transdisciplinary cooperation. Thus papers will examine ethical, political and social issues, health, safety and risk, lessons from nature, planning and development and new technologies.
