forces that are intent on thwarting God's creative work. In seeking a response to these questions, this book argues that the biblical accounts describe creation in terms of a progressive transformation process whereby the initially incomplete created order will reach perfection only in the fulfillment of new creation. The following discussion then outlines a comprehensive framework for the biblical theology of humanity's struggles centered on three key themes: corporeal temptation, deficient social structures, and the much debated notion of spiritual warfare. The book presents an overarching canonical narrative that threads together a series of diverse biblical topics from Job's temptation to the Atonement. The final part surveys biblical teaching on how human conduct can be aligned with God's creative purpose and discusses three assignments from Jesus to believers: to celebrate the Eucharist, to pray the Lord's Prayer, and to fulfill the Great Commission. Talent All in All Dr. Dragan P. Bogunovic MD, 2015-06-30

I never thought about human's talent prior to having the opportunity to read about my granddaughters introduction to orthopedic surgery at Washington University in St. Louis. I knew I wanted to be a physician since fifth grade. Dr. Lily Bogunovic Rest is described in toto in my book. Word talent has been used in human's conversation for centuries without any deep meaning as human's talent deserves as an essential part of human's life as for every human's life direction and life purpose to be realized in period depending on the power of given talent as every electrical power that we are not able to see but only to observe its given fruits result. What talent is, no one can confirm with certainty because no one ever seen talent that is as I said like electrical power that we see not but what we see its light that is result of that invisible power. There are many different beliefs about what talent is and is no argument on my side because I do respect everybody's opinion and believe with assumption that talent is everybody's personal property as I do call gift that is given free but not with free responsibilities that are much expensive. Talent is as I intended to present as a power of love that is in the heart that must be born mainly in loving and carrying family where mother has essential importance together with father's support. Born in family and later dressed or better to say educated in education as a best way for the future of that given gift. Talent was dressed in education to be indoctrinated in society by providing adequate place for its activities. We must accept that talent is like Duracell batteries with limited lasting that must be utilized in given time. I personally worked 50 years as medical doctor to finish in time when I felt that here is no more power in my battery, my talent, and that I am at present time alone in this world ready to retire. My goal is to share my experience with my children that are born with different talent to become and to enter our society ready for their life duty according to given talents. DPB
