Respiratory Health Effects of Airborne Hazards Exposures in the Southwest Asia Theater of Military Operations National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on the Respiratory Health Effects of Airborne Hazards Exposures in the Southwest Asia Theater of Military Operations, 2020-09-23 More than 3.7 million U.S. service members have participated in operations taking place in the Southwest Asia Theater of Military Operations since 1990. These operations include the 1990-1991 Persian Gulf War, a post-war stabilization period spanning 1992 through September 2001, and the campaigns undertaken in the wake of the September 11, 2001 attacks. Deployment to Iraq, Kuwait, Saudi Arabia, Bahrain, Gulf of Aden, Gulf of Oman, Oman, Qatar, the United Arab Emirates, and Afghanistan exposed service members to a number of airborne hazards including oil well fire smoke emissions from open burn pits, dust and sand suspended in the air, and exhaust from diesel vehicles. The effects of these were compounded by stressors like excessive heat and noise that are inevitable attributes of service in a combat environment. *Respiratory Health Effects of Airborne Hazards Exposures in the Southwest Asia Theater of Military Operations* reviews the scientific evidence regarding respiratory health outcomes in veterans of the Southwest Asia conflicts and identifies research that could feasibly be conducted to address outstanding questions and generate answers. Newly emerging technologies that could aid in these efforts and organizations that the Veterans Administration might partner with to accomplish this work.

What We Know About Grading Thomas R. Guskey, Susan M. Brookhart, 2019-02-04 Grading is one of the most hotly debated topics in education and grading practices themselves are largely based on tradition, instinct, or personal history or philosophy. But to be effective, grading policies and practices must be based on trustworthy research evidence. Enter this book: a review of 100 plus years of grading research that presents the broadest and most comprehensive summary of research on grading and reporting available to date with clear takeaways for learning and teaching. Edited by Thomas R. Guskey and Susan M. Brookhart, this indispensable guide features thoughtful, thorough dives into the research from a distinguished team of scholars geared to a broad range of stakeholders including teachers, school leaders, policymakers, and researchers. Each chapter addresses a different area of grading research and

describes how the major findings in that area might be leveraged to improve grading policy and practice Ultimately Guskey and Brookhart identify four themes emerging from the research that can guide these efforts Start with clear learning goals Focus on the feedback function of grades Limit the number of grade categories and Provide multiple grades that reflect product process and progress criteria By distilling the vast body of research evidence into meaningful actionable findings and strategies this book is the jump start all stakeholders need to build a better understanding of what works and where to go from here
